**Bullshit** Jevin D. West, Carl T. Bergstrom, 2020-08-04 A necessary book for our times. But also just great fun. Saul Perlmutter, Nobel Laureate. The world is awash in bullshit and we're drowning in it. Politicians are unconstrained by facts. Science is conducted by press release. Start-up culture elevates hype to high art. These days, calling bullshit is a noble act. Based on a popular course at the University of Washington, *Calling Bullshit* gives us the tools to see through the obfuscations, deliberate and careless, that dominate every realm of our lives. In this lively guide, biologist Carl Bergstrom and statistician Jevin West show that calling bullshit is crucial to a properly functioning social group, whether it be a circle of friends, a community of researchers, or the citizens of a nation. Through six rules of thumb, they help us recognize bullshit whenever and wherever we encounter it, even within ourselves, and explain it to a crystal-loving aunt or casually racist grandfather. **Educational**

**Entrepreneurship Today** Frederick M. Hess, Michael Q. McShane, 2021-03-04 In *Educational Entrepreneurship Today*, Frederick M. Hess and Michael Q. McShane assemble a diverse lineup of high-profile contributors to examine the contexts in which new initiatives in education are taking shape. They inquire into the impact of entrepreneurship on the larger field, including the development and deployment of new technologies and analyze the incentives, barriers, opportunities, and tensions that support or constrain innovation. Over the past decade, entrepreneurship has moved from the periphery to the center of education reform. Policy measures, philanthropic support, and venture capital increasingly promote initiatives that drive innovation within and outside the traditional education sector. These initiatives have included spectacular successes like Khan Academy, Teach For America, and Wireless Generation, as well as highly visible failures like the InBloom data warehouse.

Educational Entrepreneurship Today offers critical perspectives on the impact of entrepreneurship and also includes lessons from leading entrepreneurs in which they use case studies drawn from their own experience to illustrate the realities of leading disruptive change in education and pose guiding questions for the next generation of innovators In a time of increasing polarization around education policy this timely frank and insightful volume shows how we can begin to create systems in which entrepreneurial ideas and fresh thinking are welcomed constructively employed and held accountable for the public good
