iCloud encrypts your data to keep it secure. Advanced Data Protection uses end-to-end encryption to ensure that the iCloud data types listed here can only be decrypted on your trusted devices, protecting your information even in the case of a data breach in the cloud. [Learn how encryption is used.](#)

Because Apple will not have the keys required to recover your data, using Advanced Data Protection requires setting up an alternative recovery method in case you ever lose access to your account.
