Everyday Data Cultures Jean Burgess,Kath Albury,Anthony McCosker,Rowan Wilken,2022-06-08 The AI revolution can seem powerful and unstoppable extracting data from every aspect of our lives and subjecting us to unprecedented surveillance and control But at ground level even the most advanced smart technologies are not as all powerful as either the tech companies or their critics would have us believe From gig worker activism to wellness tracking with sex toys and TikTokers manipulation of the algorithm this book shows how ordinary people are negotiating the datafication of society The book establishes a new theoretical framework for understanding everyday experiences of data and automation and offers guidance on the ethical responsibilities we share as we learn to live together with data driven machines Everyday Data Cultures is essential reading for students and researchers in digital media and communication as well as for anyone interested in the role of data and AI in society

Secrets of Successful Women Inventors Edith G. Tolchin,2023-10-03 Edith G Tolchin has spent her entire career working with inventors In Secrets of Successful Women Inventors Edith highlights some of the greatest top notch successful women inventors and reputable service providers all eager to share their stories and advice In her easy going personable style Edith has gleaned the cream of the crop from each of these impressive women It s a gift to anyone who s ever had a winning idea but nowhere to go and no roadmap to birth their vision Barbara Corcoran Shark on ABC s hit TV show Shark Tank and founder of the Corcoran Group Secrets of Successful Women Inventors How They Swam with the Sharks and Hundreds of Other Ways to Commercialize Your Own Inventions by Edith G Tolchin a chatty practical user friendly guidebook amply delivers on the promise of its title Letty Cottin Pogrebin founder of Ms magazine Until recently history has tended to highlight male inventors but why not women inventors as well And where are the women inventors of color Why have so many of these women not found their rightful places in history Thankfully over the last few decades with increasing

opportunities to shatter the glass ceiling women have begun to achieve equal footing with men in careers and in salaries Women worldwide have also made great gains with their inventions While in the past many of their inventions have been largely related to the improvement of household and child care items things have changed With women achieving influential positions in business scientific research and government women s creative innovations are limitless In her new book *Secrets of Successful Women Inventors* Edith G Tolchin reveals the real life stories of over twenty successful modern day women inventors stories that describe their hard work frequent struggles and relentless dedication to their ideas Ms Tolchin presents a look behind the scenes at their respective journeys from their inventions first being sketched on napkins to the creation of multimillion dollar companies and offers sound advice to future inventors from several accomplished invention service providers She also includes brief snippets of information on women inventors throughout history While this book is about women who had dreams and made them come true it can also serve as a blueprint for any woman looking to turn her own ideas into reality

Surveillance Education Nolan Higdon, Allison Butler, 2024-08-02 Surveillance Education explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students Recognizing that the use of digital technologies will persist the authors instead offer practical ways to ameliorate their impact In our era of surveillance capitalism digital media technologies are ever more intertwined into the educational process Schools are presented with digital technologies as tools of convenience for gathering and grading student work as tools of support to foster a more equitable learning environment and as tools of safety for predicting or preventing violence or monitoring mental emotional and physical health Despite a dearth of evidence to confirm their effectiveness digital data collection and tracking is often presented as a way to improve educational outcomes and safety This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education
