Elegant Design Luca Iandoli, Giuseppe Zollo, 2022-03-10 Visual information is everywhere We are constantly immersed in a flow of visual data that reshapes our social and inner world Companies and individuals are competing to conquer the public's scarce attention by inventing distinctive visual formats to stand out from the crowd How can designers inventors and product managers create designs that are quick to process as well as meaningful unique and memorable in an age characterized by constant information overload The answer is to think aesthetically Research insights at the intersection between cognitive science and art studies demonstrate that our minds can effectively process visual complexity by using aesthetic pleasure and judgement as a guide Analysing the work of great artists and designers from the perspective of how our mind appreciates beauty *Elegant Design* identifies actionable aesthetic strategies that will help you to design products and user experiences that are useful beautiful and meaningful

The business model cycle Sophia von Berg, 2020-12-17

Today firms all over the world have to deal with dynamic business environments Fast moving digitalization has made information more transparent strengthening the role of the customer At the same time the provider can have a much closer relationship with the user thanks to real time communication However corporate practice does not have a process for developing dynamic business models and user centric business models that can be designed and changed using smart technologies have not yet been systematically integrated To stay competitive companies need to rise to this challenge The aim of this dissertation was to develop a dynamic user centric process model for business model design and change and to evaluate the model's ability to maintain a competitive advantage in the mobility sector First the differences between static dynamic and user centric business models and their corresponding attributes were deduced Then these findings were combined into a process model using system dynamics logic This model considers the user a co creator of value and helps managers react to real time changes in their business model environment Finally a mobility sector case study is presented to highlight the relevance of this model to real world application This business model cycle BMC supports the strategic management of dynamic user centric business model design and change activities It describes a step by step procedure of business model design that includes ideation prototyping and integration of business model options Moreover it allows continuous monitoring of the business model environment and adaption of the model accordingly At the same time bidirectional interaction between the user and provider is possible allowing the provider to adapt to their users needs The BMC is unique in that these processes can take place simultaneously Finally the real world case study in the mobility sector confirmed that using the BMC for strategic management maintains a lasting competitive business advantage
