Necessity Lost Sanford Shieh,2019-03-21 A long tradition going back to Aristotle conceives of logic in terms of necessity and possibility a deductive argument is correct if it is not possible for the conclusion to be false when the premises are true A relatively unknown feature of the analytic tradition in philosophy is that at its very inception this venerable conception of the relation between logic and necessity and possibility the concepts of modality was put into question The founders of analytic philosophy Gottlob Frege and Bertrand Russell held that these concepts are empty there are no genuine distinctions among the necessary the possible and the actual In this book the first of two volumes Sanford Shieh investigates the grounds of this position and its consequences for Frege s and Russell s conceptions of logic The grounds lie in doctrines on truth thought and knowledge as well as on the relation between mind and reality that are central to the philosophies of Frege and Russell and are of enduring philosophical interest The upshot of this opposition to modality is that logic is fundamental and to be coherent modal concepts would have to be reconstructed in logical terms This rejection of modality in early analytic philosophy remains of contemporary significance though the coherence of modal concepts is rarely questioned nowadays because it is generally assumed that suspicion of modality derives from logical positivism which has not survived philosophical scrutiny The anti modal arguments of Frege and Russell however have nothing to do with positivism and remain a challenge to the contemporary acceptance of modal notions **Astrologia Gallica Book 22** Jean-Baptiste Morin,1994 This book is an English translation of Morin s treatise on Primary Directions which constitutes Book 22 of his *Astrologia Gallica* with appendices containing supplementary material relating to Book 22 and addenda containing fundamental astrological principles in particular the Table of Universal Rulerships of the Planets from Book 13 the Universal Laws of Judgments of Solar and Lunar Returns from Book 23 and Aphorisms stating the Principal Laws of Transits along with Rules for the Prediction of Future Events from Book 24 This translation supplements Richard S Baldwin s translation of Book 21 on Determinations also published by the AFA The two translations together provide a core subset of the theory of Natal Astrology set forth by J B Morin 1583 1656 the leading figure of French astrology Morin s theory is based upon the use of determinations and accidental significators Thus it differs radically from the common theory that largely ignores derived houses and uses universal significators Also it is event oriented rather than esoteric or psychological The translator James
