## **Public Sector Decentralization:**

*Public Sector Reform in Developing and Transitional Countries* Christopher Rees, Farhad Hossain, 2013-09-13 Over recent decades decentralization has emerged as a key Public Sector Reform strategy in a wide variety of international contexts Yet despite its emergence as a ubiquitous activity that cuts across disciplinary lines in international development decentralization is understood and applied in many different ways by parties acting from contrary perspectives This book offers a fascinating insight into theory and practice surrounding decentralization activities in the Public Sectors of developing and transitional countries In drawing on the expertise of established scholars the book explores the contexts achievements progress and challenges of decentralization and local governance Notably the contributions contained in this book are genuinely international in nature the chapters explore aspects of decentralization and local governance in contexts as diverse as Ghana Hong Kong India Indonesia Kazakhstan Morocco Tanzania Uganda and Viet Nam In summary by examining the subject of decentralization with reference to specific developing and transitional Public Sector contexts in which it has been practiced this book offers an excellent contribution towards a better understanding of the theory and practice of decentralization and local governance in international settings This book was published as a special double issue of the *International Journal of Public Administration*

*Public Sector Decentralization* Jerry M. Silverman, 1992-01-01 This paper is addressed to a broad audience of development professionals who are interested in both the substance of decentralisation issues and their impact on economic development The paper summarises experience with alternative decentralisation arrangements and suggests a new analytical framework for assessing the impact of such arrangements on the performance of economic development programmes and projects Consideration of alternative forms of decentralisation reveals the need to clarify and establish priorities among economic and political objectives The potential for conflict among multiple objectives and the need to assess decentralisation policies in terms of acceptable trade offs among those objectives summarises the importance of this paper

**Public Sector Decentralization** Jerry M. Silverman, 1990

Decentralization and Service Delivery, 2005 Dissatisfied with centralized approaches to delivering local public services a large number of countries are decentralizing responsibility for these services to lower level locally elected governments The results have been mixed The paper provides a framework for evaluating the benefits and costs in terms of service delivery of different approaches to decentralization based on relationships of accountability between different actors in the delivery chain Moving from a model of central provision to that of decentralization to local governments introduces a new relationship of accountability between national and local policymakers while altering existing relationships such as that between citizens and elected politicians Only by examining how these relationships change can we understand why decentralization can and sometimes cannot lead to better service delivery In particular the various instruments of decentralization fiscal administrative regulatory market and

financial can affect the incentives facing service providers even though they relate only to local policymakers Likewise and perhaps more significantly the incentives facing local and national politicians can have a profound effect on the provision of local services Finally the process of implementing decentralization can be as important as the design of the system in influencing service delivery outcomes **Public Sector Decentralization** Jerry M. Silverman, Banco Mundial, 1992

**Decentralization and Public Sector Efficiency** Akhmad Syakir Kurnia, 2013 Theoretical literature claims that improved efficiency is considered as the main outcome expected from a decentralized system of public service provision Hence analysing public sector efficiency provides the de facto measure of the ability of decentralized local government in internalizing the benefits of fiscal and political decentralization However the outcome of decentralization does not always fit with the theoretical claims First there are always externalities arising from spillovers between localities that should be taken into account and set against improved accountability Second decentralization may paradoxically diminish accountability in a situation where local governments enjoy a degree of cohesiveness with central government cohesiveness of interest groups at the local level is high and local voter ignorance is also high Third lack of democratic institutions and norms that essentially complement electoral democratization have been an obstruction to improved accountability This happens particularly in young democratized countries This book investigates public sector efficiency in the decentralized Indonesia within its political and institutional arrangements **Decentralization and Public Services** Peyvand Khaleghian, 2003

**Managing Public Services** Richard Common, Norman Flynn, Elizabeth Mellon, 2016-06-06 Managing Public Services Competition and Decentralization is intended for public sector managers to help them assess their situation and assist them to think creatively about different approaches for the future The book begins on the general principle that business is good and bureaucracy is bad This topic is followed by detailed studies of organizations whether these are in a competitive environment victims of market rhetoric or in another competitive spectrum Public sector managers are then encouraged to analyze their own organizations so appropriate actions can be applied into their situation The extent to which competition is happening is explained and if competition does not work well then the concept of decentralization may be adopted To what extent decentralization can then be used to increase the motivation and commitment of their employees is explained The authors believe that new ways and methods of working will follow But any successes of these changes have to be measured by an important gauge the impact upon the recipients of the new and improved services In any undertaking failures are bound to happen and the authors suggest that public sector managers should be more tolerant Finally the book notes that to achieve delivery of quality service whether these are for customers or clients an important approach to managerial action is the design towards a good experience Public administrators heads and CEOs of public institutions and private firms professors and students in public administration policymakers and sociologists will find this book valuable

**Decentralization and the Provision of Public Services** Aehyung Kim, *Fiscal Decentralization and Local Finance*

*in Developing Countries* Roy Bahl, Richard M. Bird, 2018-03-30 This book draws on experiences in developing countries to bridge the gap between the conventional textbook treatment of fiscal decentralization and the actual practice of subnational government finance The extensive literature about the theory and practice is surveyed and longstanding problems and new questions are addressed It focuses on the key choices that must be made in decentralizing on how economic and political factors shape the choices that countries make and on how by paying more attention to the need for a more comprehensive approach and the critical connections between different components of decentralization reform everyone involved might get more for their money      **Decentralization in the Public Sector in Sweden** Sven Moberg, 1986      Decentralised

Government in an Integrating World Dan Stegarescu, 2006-01-17 The book offers a comprehensive empirical analysis of the determinants of changes in the distribution of expenditure and revenue raising powers among fiscal tiers in OECD countries Using a new indicator of fiscal decentralisation which accounts for subnational decision making autonomy common decentralisation trends are investigated Then empirical evidence from panel analyses is provided for the role of costs preferences and institutions in explaining fiscal federal structures and for the impact of economic and political integration on the degree of government decentralisation particularly among EU countries Finally the historical experience of Germany is used to explore long term developments in the public sector      Decentralization and Power Sharing Institute of Public

Administration of Canada. National Seminar, David M.
