Sleep Hacks Ipad Usa:

Your Happiness Was Hacked Vivek Wadhwa, Alex Salkever, 2018-06-26 Wadhwa and Salkever have written a great book to help us understand our addiction to technology and suggest what we can do about it. André Oppenheimer, columnist for the Miami Herald, joint winner of the 1987 Pulitzer Prize. Technology: your master or your friend? Do you feel ruled by your smartphone and enslaved by your email or social network activities? Digital technology is making us miserable, say bestselling authors and former tech executives Vivek Wadhwa and Alex Salkever. We've become a tribe of tech addicts and it's not entirely our fault. Taking advantage of vulnerabilities in human brain function, tech companies entice us to overdose on technology interaction. This damages our lives, work, families, and friendships. Swipe-driven dating apps train us to evaluate people like products, diminishing our relationships. At work, we email on average seventy-seven times a day, ruining our concentration. At home, light from our screens is contributing to epidemic sleep deprivation. But we can reclaim our lives without dismissing technology. The authors explain how to avoid getting hooked on tech and how to define and control the roles that tech is playing and could play in our lives. And they provide a guide to technological and personal tools for regaining control. This readable book turns personal observation into a handy action guide to adapting to our new reality of omnipresent technology. Technology is a great servant but a terrible master. This is the most important book ever written about one of the most significant aspects of our lives: the consequences of our addiction to online technology and how we can liberate ourselves and our children from it. Dean Ornish, New York Times bestselling author of *Undo It*, *Time, Law, and Change*. Sofia Ranchordás, Yaniv Roznai, 2020-04-16 Offering a unique perspective on an overlooked subject, the relationship between time, change, and lawmaking, this edited collection brings together world-leading experts to consider how time considerations and social, political, and technological change affect the legislative process, the interpretation of laws, the definition of the powers of the government, and the ability of legal orders to promote innovation. Divided into four parts, each part considers a different form of interaction between time and law and change. The first part offers legal, theoretical, and historical perspectives on the relationship between time and law and how time shapes law and influences legal interpretation and constitutional change. The second part offers the reader an analysis of the different ways in which courts approach the impact of time on law, as well as theoretical and empirical reflections upon the meaning of the principle of legal certainty, legitimate expectations, and the influence of law over time. The third part of the book analyses how legislation and the legislative process addresses time and change and the various challenges they create to the legal order. The fourth and final part addresses the complex relationship between fast-paced technological change and the regulation of innovations.
