Serial Murders United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Juvenile Justice, 1984

Pattern of Murder Nigel Morland, 1966      Bioethics, Medicine and the Criminal Law: Volume 2, Medicine, Crime and Society Danielle Griffiths, Andrew Sanders, 2013-01-31

In recent years debates have arisen concerning the encroachment of the criminal process in regulating fatal medical error the implementation of the Corporate Manslaughter and Corporate Homicide Act 2007 and the recent release of the Director of Public Prosecution's assisted suicide policy Consequently questions have been raised regarding the extent to which such intervention helps or if it in fact hinders the sustained development of medical practice In this collection Danielle Griffiths and Andrew Sanders explore the operation of the criminal process in healthcare in the UK as well as in other jurisdictions including the USA Australia New Zealand France and the Netherlands Using evidence from previous cases alongside empirical data each essay engages the reader with the debate surrounding what the appropriate role of the criminal process in healthcare should be and aims to clarify and shape policy and legislation in this under researched area

Mothers Who Murder Dr Xanthe Mallett, 2014

Child murder A social taboo and one of the most abhorrent acts most of us can imagine Meet the women found guilty of murdering their own children They represent some of the most hated women in Australia The infamous list includes psychologically damaged sometimes deranged women on the edge But as we will see accused doesn't always mean guilty Among the cases covered is that of Kathleen Folbigg accused and found guilty of killing four of her children even with a lack of any forensic evidence proving her guilt Rachel Pfitzner who strangled her 2 year old son and dumped his body in a duck pond as well as Keli Lane found guilty of child murder though no body has ever been found Dr Mallett goes back to the beginning of each case death's ground zero That might be the accused's childhood were they abused Or was their motivation greed or fear of losing a partner Were they just simply evil Or did the media paint them as such against the evidence and leading to a travesty of justice Each case will be re-opened the alternative suspects assessed the possible motives reviewed Informed by her background as a forensic scientist Xanthe will offer insight into aspects of the cases that may not have been explored previously Taking you on her journey through the facts and reaching her own conclusion as to whether she believes the evidence points to the women's guilt Hear their stories

*The Decline Effect* Dean Brooks, 2023-01-31

A crisis is coming for everyone who uses math and science For decades now the classical model of probability the indifference principle and the Gaussian distribution has been breaking down and revealing its limitations in fields from economics to epidemiology Now a new approach has revealed the underlying non-classical principle behind all these anomalous laws Pareto's law of elite incomes Zipf's law of word frequencies Lotka's law of scientific publications Kleiber's law of metabolic rates the Clausewitz Dupuy law of combat friction Moore's law of computing costs the Wright Henderson cost law Weibull's

law of electronics failures the Flynn Effect in IQ scores Benford's law of digit frequencies Farr's law of epidemics Hubbell's neutral theory of biodiversity Rogers law of innovation classes Wilson's law of island biogeography Smeed's law of traffic fatalities The general law behind all these particular laws and countless others is the decline effect As a system ages or grows in size the rules of probability subtly change Entropy increases rare items become rarer and average performance measures decline The human meaning of a decline may be positive decreasing costs falling epidemic mortality or negative lower customer loyalty decreasing efficiency but the mathematical pattern is always the same The implications are enormous as these examples show All epidemic diseases decline in infectiousness and in lethality HIV AIDS went from a highly infectious 95 percent fatal disease to a survivable condition with a latency of decades COVID 19 went from a death rate of 7 percent in early 2020 to under 2 percent in 2022 Hereditary dynasties around the world declined smoothly in lifespan from hundreds of years to tens of years When democracies replaced monarchies the decline in spans of party control continued
