Biomedical Image Registration Stefan Klein, Marius Staring, Stanley Durrleman, Stefan Sommer, 2018-06-06 This book constitutes the refereed proceedings of the 8th International Workshop on Biomedical Image Registration WBIR 2018 held in Leiden The Netherlands in June 2018 The 11 full and poster papers included in this volume were carefully reviewed and selected from 17 submitted papers The papers are organized in the following topical sections Sliding Motion Groupwise Registration Acceleration and Applications and Evaluation **Search Games and Other Applications of Game Theory** Andrey Garnaev, 2000-05-06 This book is on applications of game theory The title of this book is not Game Theory and its Applications because it does not construct a general theory for considered games The book contains a lot of examples of application of game theory together with the background of those games considered and a list of unsolved problems Also we consider only the game where the optimal strategies of the players are found in closed form This book is an attempt to carry on the approach developed in nice books Search Games by Gal and Geometric Games and their Applications by Ruckle The first chapter of this book supplies the required definitions and theorems from game theory The second chapter deals with discrete search games where both players act simultaneously the games of protection of a channel from infiltration of a submarine the submarine versus helicopter game the matrix search games and others The third chapter considers the game where the players allocate their continuous efforts In these games players face up an alternative either not to come into contest if the cost of efforts seems too high or come into it In the last case the player have to decide how much resources they can afford to spend The allocation models of search antiballistic protection and marketing are investigated *ACM Transactions on Modeling and Computer Simulation* ,1994 Proceedings of the ...
