Vitamin Longevity Secrets Samuel Livingston, AI, 2025-02-21 Vitamin Longevity Secrets explores the potential of vitamins to enhance cellular repair and slow down aging. It investigates how specific vitamins influence cellular pathways and combat age-related decline, offering insight into optimizing healthspan. For example, vitamins act as antioxidants, fighting oxidative stress and protecting cells from damage caused by free radicals. The book provides a research-backed approach to vitamin supplementation, focusing on key vitamins like Vitamin D, Vitamin C, Vitamin E, and B vitamins. These are examined through nutritional studies and epidemiological data to understand their impact on cellular health and DNA protection. It begins with cellular biology and aging theories, progressing to detailed analyses of individual vitamins and culminating in practical strategies for incorporating them into daily life.

How Not to Age Michael Greger, M.D., FACLM, 2023-12-05 Instant New York Times Bestseller. Uncover the evidence-based science to slowing the effects of aging from the New York Times bestselling author of the How Not to Die series. When Dr. Michael Greger, founder of NutritionFacts.org, dove into the top peer-reviewed anti-aging medical research, he realized that diet could regulate every one of the most promising strategies for combating the effects of aging. We don't need Big Pharma to keep us feeling young; we already have the tools. In *How Not to Age*, the internationally renowned physician and nutritionist breaks down the science of aging and chronic illness and explains how to help avoid the diseases most commonly encountered in our journeys through life. Physicians have long treated aging as a malady, but getting older does not have to mean getting sicker. There are eleven pathways for aging in our bodies' cells, and we can disrupt each of them. Processes like autophagy, the upcycling of unusable junk, can be boosted with spermidine, a compound found in tempeh, mushrooms, and wheat germ. Senescent 'zombie' cells that spew inflammation and are linked to many age-related diseases may be cleared in part with quercetin-rich foods like onions, apples, and kale. And we can combat effects of aging without breaking the bank. Why spend a small fortune on vitamin C and nicotinamide facial serums when you can make your own for up to 2,000 times cheaper? Inspired by the dietary and lifestyle patterns of centenarians and residents of blue zone regions where people live the longest, Dr. Greger presents simple, accessible, and evidence-based methods to preserve the body functions that keep you feeling youthful, both physically and mentally. Brimming with expertise and actionable takeaways, *How Not to Age* lays out practical strategies for achieving ultimate longevity.
