Probabilistic Prediction of Energy Demand and Driving Range for Electric Vehicles with Federated Learning

Thorgeirsson, Adam Thor,2024-09-03 In this work an extension of the federated averaging algorithm FedAvg Gaussian is applied to train probabilistic neural networks The performance advantage of probabilistic prediction models is demonstrated and it is shown that federated learning can improve driving range prediction Using probabilistic predictions routing and charge planning based on destination attainability can be applied Furthermore it is shown that probabilistic predictions lead to reduced travel time

Connected and Autonomous Vehicles in Smart Cities Hussein T. Mouftah,Melike Erol-Kantarci,Sameh Sorour,2020-12-17 This book presents a comprehensive coverage of the five fundamental yet intertwined pillars paving the road towards the future of connected autonomous electric vehicles and smart cities The connectivity pillar covers all the latest advancements and various technologies on vehicle to everything V2X communications networking and vehicular cloud computing with special emphasis on their role towards vehicle autonomy and smart cities applications On the other hand the autonomy track focuses on the different efforts to improve vehicle spatiotemporal perception of its surroundings using multiple sensors and different perception technologies Since most of CAVs are expected to run on electric power studies on their electrification technologies satisfaction of their charging demands interactions with the grid and the reliance of these components on their connectivity and autonomy is the third pillar that this book covers On the smart services side the book highlights the game changing roles CAV will play in future mobility services and intelligent transportation systems The book also details the ground breaking directions exploiting CAVs in broad spectrum of smart cities applications Example of such revolutionary applications are autonomous mobility on demand services with integration to public transit smart homes and buildings The fifth and final pillar involves the illustration of security mechanisms innovative business models market opportunities and societal economic impacts resulting from the soon to be deployed CAVs This book contains an archival collection of top quality cutting edge and multidisciplinary research on connected autonomous electric vehicles and smart cities The book is an authoritative reference for smart city decision makers automotive manufacturers utility operators smart mobility service providers telecom operators communications engineers power engineers vehicle charging providers university professors researchers and students who would like to learn more about the advances in CAEVs connectivity autonomy electrification security and integration into smart cities and intelligent transportation systems
