**The Quintessence of Basic and Clinical Research and Scientific Publishing** Gowraganahalli Jagadeesh,Pitchai Balakumar,Fortunato Senatore,2023-09-30 The book intended for

biomedical researchers attempts to foster a comprehensive understanding of the elements that impact scientific research such as clinical trial design communication and publication methods It introduces the process of idea generation and creative critical thinking leading to the development of key concepts that coalesce into theoretical constructs and working hypotheses The book systematically delineates research phases associated with a bench to bedside translational approach providing the full depth and breadth of drug discovery and development design synthesis and optimization of drug candidates interacting with targets linked to diseases as well as clinical trial design to acquire substantial evidence of efficacy and safety for candidate drugs in the target patient population New and evolving topics such as artificial intelligence machine and deep learning drug repurposing approaches and bioinformatics are incorporated into the text as these features are becoming integrated into drug research and development Additionally it covers publication strategies including literature search manuscript preparation data presentation relevant discussion editorial processes elements of peer review and bibliometrics Finally the book addresses grantsmanship key strategies for building effective networks mentorships maintaining research integrity and forging career advancement opportunities including entrepreneurship Delphi method for evaluating scientific research proposals in a neutrosophic environment Florentin Smarandache, Jesús Estupiñán Ricardo, Erick González Caballero, Maikel Yelandi Leyva Vázquez, Noel Batista Hernández, The scientific research proposal is part of the task to be carried out in academic and research institutions around the world This is a complex decision making problem because decision makers must determine the projects that are appropriate to the subjects addressed by the institution those projects must be achievable within a reasonable deadline they must have the financial means and the budget necessary to be carried out the staff must be sufficiently qualified and an optimum number of personnel must be available to succeed the tasks and not interfere with other research projects US Presidential Doctrines Handbook - Volume 1 President Barack Obama Doctrine - Strategic Information and Materials IBP, Inc., 2017-01-11 US Presidential Doctrines Handbook Reagan Carder Clinton Bush Obama **Insurgency and Counterinsurgency in Modern War** Scott Nicholas Romaniuk, Stewart Tristan Webb, 2015-08-22 A collection of original works covering all aspects of insurgency and counterinsurgency through a multinational lens Insurgency and Counterinsurgency in Modern War addresses the need to look beyond the United States and other prominent counterinsurgency actors in the contemporary world It also reassesses some of the latent and burgeoning insurgen **Uniting Knowledge Integrated Scientific Research For Global Development** Seven editors, VI Latin American Congress on Biomedical Engineering CLAIB 2014, Paraná, Argentina 29, 30 & 31 October 2014 Ariel Braidot, Alejandro Hadad, 2015-03-13 This volume presents the proceedings of the CLAIB 2014 held in Paran Entre R os Argentina 29 30 Sensors Micro and Nano Technologies Biomaterials Tissue Engineering and Artificial Organs Biomechanics Robotics and Motion Analysis Biomedical Images and Image Processing Biomedical Signal Processing Clinical Engineering and Electromedicine Computer and Medical Informatics Health and home care telemedicine Modeling and Simulation
