The Core Data coverage alone is worth the price of admission. But there's so much more. *More iOS 6 Development* covers a variety of networking mechanisms from GameKit's relatively simple Bluetooth peer-to-peer model to the addition of Bonjour discovery and network streams through the complexity of accessing files via the web. Dave, Alex, Kevin, and Jeff will also take you through coverage of concurrent programming and some advanced techniques for debugging your applications. The enhanced multitasking, threading, memory management, and more are important. Apps are getting more and more complex, including sophisticated game apps that offer virtual or augmented reality experiences and new mapping views that take advantage of sensors and other APIs in the newest iOS 6 SDK. Whether you are a relative newcomer to iPhone and iPad or iOS development or an old hand looking to expand your horizons, there's something for everyone in *More iOS 6 Development*.
