**Mathematical Modeling in Combustion and Related Topics** Claude-Michel Brauner,Claudine Schmidt-Lainé,2012-12-06 This volume contains invited lectures and contributed papers presented at the NATO Advanced Research Workshop on Mathematical Modeling in Combustion and related topics held in Lyon France April 27 30 1987 This conference was planned to fit in with the two month visit of Professor G S S Ludford to the Ecole Centrale de Lyon He kindly agreed to chair the Scientific and Organizing Committee and actively helped to initiate the meeting His death in December 1986 is an enormous loss to the scientific community in general and in particular to the people involved in the present enterprise The subject of mathematical modeling in combustion is too large for a single conference and the selection of topics reflects both areas of recent research activity and areas of interest to Professor G S S Ludford to whose memory the Advanced Workshop and this present volume are dedicated The meeting was divided into seven specialized sessions detonation theory mathematical analysis numerical treatment of combustion problems flame theory experimental and industrial aspects complex chemistry and turbulent combustion It brought together researchers and engineers from University and Industry see below the closing remarks of the workshop by Prof N Peters The articles in this volume have been judged and accepted on their scientific quality and language corrections may have been sacrificed in order to allow quick dissemination of knowledge to prevail      *Service Science, Management, and Engineering:* Gang Xiong,Zhong Liu,Xiwei Liu,Fenghua Zhu,Dong Shen,2012-04-17 The Intelligent Systems Series comprises titles that present state of the art knowledge and the latest advances in intelligent systems Its scope includes theoretical studies design methods and real world implementations and applications Service Science Management and Engineering presents the latest issues and development in service science Both theory and applications issues are covered in this book which integrates a variety of disciplines including engineering management and information systems These topics are each related to service science from various perspectives and the book is supported throughout by applications and case studies that showcase best practice and provide insight and guidelines to assist in building successful service systems Presents the latest research on service science management and engineering from both theory and applications perspectives Includes coverage of applications in high growth sectors along with real world frameworks and design techniques Applications and case studies showcase best

practices and provide insights and guidelines to those building and managing service systems *Life Sciences : Exobiology* COSPAR. Scientific Assembly, Gerda Horneck, 1998 NASA Historical Data Book, V. 7, 1976 This volume of the NASA Historical Data Book is the seventh in the series that describes NASA's programs and projects Covering the years 1989 through 1998 it includes the areas of launch systems human spaceflight and space science continuing the volumes that addressed these topics during NASA's previous decades Each chapter presents information much of it statistical addressing funding management and details of programs and missions *AIAA 1995 Space Programs and Technologies Conference*, 1995 **The Cassini-Huygens Visit to Saturn** Michael Meltzer, 2015-01-02 Cassini Huygens was the most ambitious and successful space journey ever launched to the outer Solar System This book examines all aspects of the journey its conception and planning the lengthy political processes needed to make it a reality the engineering and development required to build the spacecraft its 2.2 billion mile journey from Earth to the Ringed Planet and the amazing discoveries from the mission The author traces how the visions of a few brilliant scientists matured gained popularity and eventually became a reality Innovative technical leaps were necessary to assemble such a multifaceted spacecraft and reliably operate it while it orbited a planet so far from our own The Cassini Huygens spacecraft design evolved from other deep space efforts most notably the Galileo mission to Jupiter enabling the voluminous paradigm shifting scientific data collected by the spacecraft Some of these discoveries are absolute gems A small satellite that scientists once thought of as a dead piece of rock turned out to contain a warm underground sea that could conceivably harbor life And we now know that hiding under the mist of Saturn's largest moon Titan is a world with lakes fluvial channels and dunes hauntingly reminiscent of those on our own planet except that on Titan it's not water that fills those lakes but hydrocarbons These and other breakthroughs illustrate why the Cassini Huygens mission will be remembered as one of greatest voyages of discovery ever made Water Encyclopedia, Oceanography; Meteorology; Physics and Chemistry; Water Law; and Water History, Art, and Culture Jay H. Lehr, 2005-06 Volume 1 outlines water supply infrastructure The requirements for supplying water to a home a city or a factory can be very different Experts in these fields explain the nuances of the details involved in maintaining adequate quantity and quality for these different consumers Waste water management can be of even greater concern yet its management can follow similar paths when compared to sophisticated water supply treatment Both the physics and chemistry of these fields are fully covered Volume 2 deals with the big picture of regional water supplies how they become contaminated how they can be protected and how they can best serve the surrounding populations and industries Significant focus is placed upon the natural chemistry of available water supplies and its biological impacts Case studies from regions around the world offer an excellent picture of the world's water resources Impact of Aerosols (Saharan Dust and Mixed) on the East Mediterranean Oligotrophic Ecosystem, Results from Experimental Studies Paraskevi Pitta, Barak Herut, Tatiana M. Tsagaraki, 2017-11-16 In oligotrophic environments dust and nutrient inputs via atmospheric routes are considered

important sources of macro nutrients and micro trace metals fuelling primary and secondary production Yet the impact of these dust inputs on the microbial populations is not fully investigated in the Eastern Mediterranean Sea EMS The response of oligotrophic systems to dust inputs whether as positive or negative feedbacks to autotrophic and heterotrophic production and thus to biogeochemical cycling is important to examine further Experimental studies have explored nutrient additions in various combinations to determine the limiting resource to productivity or N<sub>2</sub> fixation Recent experimental studies have applied dust enrichments to bottle or mesocosm incubations of seawater from different oceanic regions This research topic presents two Eastern Mediterranean dust addition mesocosm experiments using for the first time real aerosol additions pure Saharan dust and mixed aerosols a natural mixture of desert dust and polluted European particles as well as other EMS aerosol experimental studies The Topic includes manuscripts introducing results on a the impact of Saharan dust vs mixed aerosols on the autotrophic and heterotrophic surface microbial populations in the EMS b the impact of single vs multi pulses of Saharan dust introduction into the pelagic environment of the EMS and c other experimental studies of aerosol impacts on the EMS ecosystem
