Places And Memories:

Imaginal Memory and the Place of Hiroshima Michael Perlman, 1988-01-01 Hiroshima claims a crucial yet neglected place in the psychic terrain of our individual and collective memories Drawing on recent work in depth psychology and Jungian thought this study explores the ancient art of remembering by envisioning places and images that are impressed upon the memory Enthusiastically used by ancient medieval and Renaissance explorers of soul and spirit the art of memory became a profound expression of striving for cultural reform and an end to religious cruelty Imaginal Memory and the Place of Hiroshima shows that images arising from the place of Hiroshima reveal with stark exactitude the psychic situation of our world Specific images are explored that embody unsuspected psychological values beyond their role as reminders of the concrete horror of nuclear war The process of remembering these images deepens into a commemoration of the fundamental powers at work in the psyche powers that are critical to the development of a sustained cultural commitment to peace and to the deepening and revitalizing of contemporary psychological life *Religion, Violence, Memory, and Place* Oren Baruch Stier, J. Shawn Landres, 2006 Scholars from a variety of disciplines explore the intersections of violence memory and sacred space **Place, Memory, and Healing** Ömür Harmanşah, 2014-12-05 Place Memory and Healing An Archaeology of Anatolian Rock Monuments investigates the complex and deep histories of places how they served as sites of memory and belonging for local communities over the centuries and how they were appropriated and monumentalized in the hands of the political elites Focusing on Anatolian rock monuments carved into the living rock at watery landscapes during the Late Bronze and Early Iron Ages this book develops an archaeology of place as a theory of cultural landscapes and as an engaged methodology of fieldwork in order to excavate the genealogies of places Advocating that archaeology can contribute substantively to the study of places in many fields of research and engagement within the humanities and the social sciences this book seeks to move beyond the oft conceived notion of places as fixed and unchanging and argues that places are always unfinished emergent and hybrid Rock cut monuments of Anatolian antiquity are discussed in the historical and micro regional context of their making at the time of the Hittite Empire and its aftermath while the book also investigates how such rock cut places springs and caves are associated with new forms of storytelling holy figures miracles and healing in their post antique life Anybody wishing to understand places of cultural significance both archaeologically as well as through current theoretical lenses such as heritage studies ethnography of landscapes social memory embodied and sensory experience of the world post colonialism political ecology cultural geography sustainability and globalization will find the case studies and research within this book a doorway to exploring places in new and rewarding ways *Placing Memory and Remembering Place in Canada* James Opp, John C. Walsh, 2010-11-01 Placing Memory and Remembering Place in Canada maps a fascinating terrain in memory studies by shifting the focus from nation and empire to local places that sit at the intersection of memory making and identity formation main streets city squares village museums internment camps industrial wastelands and the

rural landscape While offering a unique perspective on the politics of place and memory across differing chronologies and geographies the first part of the book Commemorations traces how local expressions of memory such as celebrations museums statues postcards and plaques have contributed to a sense of place and belonging in twentieth century Canada The second part Inscriptions in turn explores how ordinary Canadians have embedded their memories of place in oral stories photographs and the landscape itself With its focus on the materiality of image text and artefact these essays argue for an understanding of place as imagined made claimed fought for and defended always in a state of becoming

Hidden Memories Robert A. Baker, 1996-09 Alien abductions satanic kidnappings the channeling of spirits the recall of past lives and other similar bizarre experiences are reported almost daily in the media Is there a rational explanation for these events According to Robert A. Baker such irregular or supernatural experiences are manifestations of hidden memories a phenomenon in which experiences that originally make little conscious impression are filed away in the brain and later are suddenly remembered in an altered form In Hidden Memories the most recent scientific evidence on memory is used to dispel many supernatural beliefs and to show how the boundaries of human behavior are often misperceived by therapists especially those who adhere to fringe beliefs He shows how delusions and illusions affect behavior and discusses the role hypnosis imagination and suggestion play in the creation of other worldly experiences Finally Baker looks at the media's role in aiding and abetting paranormal belief in addition to promoting the growth of superstitions and popular myths
