Wearable Health Tracker Tips Chicago:

Perspectives in Business Informatics Research Robert Andrei Buchmann, Andrea Polini, Björn Johansson, Dimitris Karagiannis, 2021-09-07 This book constitutes the proceedings of the 20th International Conference on Perspectives in Business Informatics Research BIR 2021 The conference was held during September 22-24, 2021 The 16 papers presented in this volume were carefully reviewed and selected from 49 submissions They were organized in topical sections as follows: Technology adoption and acceptance during COVID-19, times, conceptual modeling for enterprise systems, enterprise modeling methods and frameworks, compliance and normative challenges, and empirical investigations on digital innovation and transformation prerequisites

Digital Health and Technological Promise Alan Petersen, 2018-11-21 What is digital health And what are its implications for medicine and healthcare and for individual citizens and society Digital health is of growing interest to policymakers, clinicians, and businesses It is underpinned by promise and optimism with predictions that digital technologies and related innovations will soon transform medicine and healthcare and enable individuals to better manage their own health and risk and to receive a more personalised treatment and care Offering a sociological perspective, this book critically examines the dimensions and implications of digital health, a term that is often ill-defined but signifies the promise of technology to empower individuals and improve their lives as well as generating efficiencies and wealth The chapters explore relevant sociological concepts and theories, changing conceptions of the self evident in citizens' growing use of wearables, online behaviours, and patient activism, changes in medical practices, especially precision or personalised medicine, and growing reliance on big data and algorithm-driven decisions, the character of the digital healthcare economy, and the perils of digital health It is argued that for various reasons, including the way digital technologies are designed and operate, and the influence of big technology companies and other interests seeking to monetise citizens' data, digital health is unlikely to deliver much of what is promised Citizens' use of digital technologies is likened to a Faustian bargain: citizens are likely to surrender something of far greater value, their personal data, than what they obtain from their use However, growing data activism and calls for algorithmic accountability highlight the potential for citizens to create alternative futures, ones oriented to fulfilling human needs rather than techno-utopian visions This ground-breaking book will provide an invaluable resource for those seeking to understand the socio-cultural and politico-economic implications of digital health

The Age of Surveillance Capitalism Shoshana Zuboff, 2019-01-31 THE TOP 10 SUNDAY TIMES BESTSELLER A NEW YORK TIMES NOTABLE BOOK OF THE YEAR ONE OF BARACK OBAMA'S TOP BOOKS OF THE YEAR Shortlisted for The Orwell Prize 2020 Shortlisted for the FT Business Book of the Year Award 2019 Easily the most important book to be published this century I find it hard to take any young activist seriously who hasn't at least familiarised themselves with Zuboff's central ideas Zadie Smith The Guardian The challenges to humanity posed by the digital future the first detailed examination of the unprecedented form of power called surveillance capitalism and the quest by powerful corporations to predict and control us

The heady optimism of the Internet's early days is gone. Technologies that were meant to liberate us have deepened inequality and stoked divisions. Tech companies gather our information online and sell it to the highest bidder, whether government or retailer. Profits now depend not only on predicting our behaviour but modifying it too. How will this fusion of capitalism and the digital shape our values and define our future? Shoshana Zuboff shows that we are at a crossroads. We still have the power to decide what kind of world we want to live in and what we decide now will shape the rest of the century. Our choices allow technology to enrich the few and impoverish the many or harness it and distribute its benefits. *The Age of Surveillance Capitalism* is a deeply reasoned examination of the threat of unprecedented power free from democratic oversight. As it explores this new capitalism's impact on society, politics, business, and technology, it exposes the struggles that will decide both the next chapter of capitalism and the meaning of information civilization. Most critically, it shows how we can protect ourselves and our communities and ensure we are the masters of the digital rather than its slaves. The Art of Latina and Latino Elderhood Katynka Z. Martínez, Mérida M. Rúa, 2022-11-20 It is widely recognized that Latinos are a sizable and diverse population and that we are a young demographic The median age of non Hispanic white Americans is 58 whereas for Latinos it is 30 Footnote1 Perhaps this partially explains the dearth of attention afforded to the topic of aging Latinos by academic scholarship and the mainstream media This special issue compellingly alerts us to the reality that there is a growing aging Latino population about which we know very little and that deserves our attention I am grateful to Katynka Martínez and Mérida Rúa for curating The Art of Latina and Latino Elderhood since this special issue responds to this significant gap in our knowledge with an exciting set of academic articles and creative contributions that challenges not only our assumptions about Latinos and aging but also our thinking on the types of contributions we include in our journal pages Katynka and Mérida make the case that the story of Latino elderhood is best conveyed through a truly multidisciplinary and interdisciplinary approach bringing together public policy humanistic social sciences and artistic interventions So for the first time Latino Studies is pleased to feature a novel in progress a photo essay dial go an artist s monologue and a dialogue among actors alongside more traditional academic articles I think you will agree that this issue before you beautifully conveys why the subject of Latinos and aging should concern all of us and that it will powerfully spur other researchers and artists to take up the
