Pittsburgh An American City:

Images of the American City Anselm L. Strauss, 2017-09-08 Originally published in 1961 *Images of the American City* examines how Americans dealt with the rapid shock of urbanization as it evolved from an agricultural nation Working from the framework of a social psychologist Anselm L. Strauss offers a deeper look into the sociological psychological and historical perspectives of urban development He describes how the cultural changes of a space ultimately develop urban imagery by looking towards the urbanization of America from peoples views of the cities rather than how the cities are themselves Urban imageries are contrasted with the context of an ideal city and visitors perspectives of cities Strauss takes a step back to ask questions about what Americans think and have thought of their cities How do these cities compare to the image of an ideal city What are the different perspectives between a city dweller and a visitor He contrasts the tension between those within the city and those outside of its urban limits Strauss describes how space and time are major themes in the symbolic urbanization of a city He offers a macroscopic view of the city as a whole and shows how urban imageries evolved from changes in lifestyles He then provides historical breakdowns of different regions of the country and how they were urbanized This book documents and illustrates the change in American symbolization from the growth of American cities to the union of urbanity and rurality

The Ever-Changing American City John F. Bauman, Roger Biles, Kristin M. Szylvian, 2011-11-26 *The Ever Changing American City* seeks to help readers understand the marked changes since 1945 in what constitutes a city in the United States and who lives and works in them The story of the postwar American city is not a simple tale of decline and rebirth Nor is it a straightforward account of the struggle between the old urban core or central business district and the suburbs on the urban periphery for both have had their economic ups and downs In the decades after World War II the cityscape was altered to better accommodate the automobile and the city gradually transformed from a place of production to a place of consumption During the 1980s city neighborhoods once occupied by migrants from the American South and immigrants from Southern and Eastern Europe began to house newcomers from Asia Africa and Central and South America The economic environmental and social issues now facing American cities from Portland Maine to Portland Oregon will require them to continue the process of remaking or reinventing themselves

American Cities and Technology Gerrylynn K. Roberts, Philip Steadman, 2005-11-01 Designed to be used on its own or as a companion volume to the *American Cities and Technology* textbook Chronologically this volume ranges from the earliest technological dimensions of Amerindian settlements to the wired city concept of the 1960s and internet communications of the 1990s Its focus extends beyond the US to include telecommunications in Asian cities in the late 20th century The topics covered the rise of the skyscraper the coming of the automobile age relations between private and public transport the development of infrastructural technologies and systems the implications of electronic communications the emergence of city planning
