Patterns in the History of Polycentric Governance in European Cities Cédric Brélaz, Thomas Lau, Hans-Joachim Schmidt, Siegfried Weichlein, 2024-03-18 The autonomy granted to local communities such as towns municipalities and city states by larger central powers such as empires kings lords and central states is a recurrent feature of European history over time from Antiquity to the contemporary period This volume explores the political social and cultural aspects of this feature in a diachronic and comparative perspective from the Roman Empire to today s city partnerships To this end it uses the concept of polycentric governance Originally developed by political economist Vincent Ostrom in the 1960s and then expanded by the 2009 winner of the Nobel Prize in Economics political scientist Elinor Ostrom this concept characterises the interdependent system of relations between different actors involved in a process and for that reason it is frequently used in policy studies This volume applies the concept of polycentric governance to historical studies as a heuristic device to analyse the multilayer systems into which cities were integrated at various points in European history as well as the implications of the coexistence of different political structures Fourteen chapters examine the structures the dynamics and the discourse of polycentric governance through various case studies from the Roman Empire from medieval towns from early modern Europe and from contemporary cities The volume suggests that for extended periods of time throughout European history polycentric governance has played a pivotal role in the organisation and distribution of political power
