The navigation of mobile robots in non-stationary and non-structured environments Victor Vladareanu ,Gabriela Tont ,Luige Vladareanu,Florentin Smarandache , The paper presents the navigation of mobile walking robot systems for movement in non stationary and non structured environments In the first approach are presented main elements for the successful completion of intelligent navigation

Real-Time Control of Walking M.D. Donner,2013-06-29 I wonder whether Karel Capek imagined in 1923 that by his use of the Czech word for forced labor rohota to name the android creations of Mr Rossum he was naming an important technology of his future Perhaps it wasn t Capek s work directly but rather its influence on Lang s movie Metropolis in 1926 that introduced the term to the popular consciousness In the public mind ever since a robot has been a me chanical humanoid tireless and somewhat sinister In the research community the field of robotics has recently reached large size and respectability but without answering the question What is robotics or perhaps What is a robot There is no real consensus for a precise definition of robotics I suppose that Capekian mechanical men if one could build them are robots but after that there is little agreement Rather than try to enumerate all of the things that are and are not robots I will try to characterize the kinds of features that make a system a robot A candidate definition of a robot is a system intended to achieve mechanical action with sensory feedback from the world to guide the actions and a sophisticated con trol system connecting the sensing and the actions

Field Robotics Philippe Bidaud,2012 This book provides state of the art scientific and engineering research findings and developments in the area of mobile robotics and associated support technologies The book contains peer reviewed articles presented at the CLAWAR 2011 conference A great deal of interest is vested in the use of robots outside the factory environment The CLAWAR conference series established as a high profile international event acts as a platform for dissemination of research and development findings and supports the trend to address current interest in mobile robotics to meet the needs of mankind in various segments of the society Field robotics aims to bring technologies that allow autonomous systems to assist and or replace humans performing tasks that are difficult repetitive unpleasant or take place in hazardous environments These robotic systems will bring sociological and economic benefits through improved human safety increased equipment utilisation reduced maintenance costs and increased production
