Realism, Naturalism, Loachism? A Study of Ken Loach's Films of the 1990s. Wenke Langhof, 2009-10 Thesis M A from the year 2002 in the subject English Language and Literature Studies Culture and Applied Geography grade 1 3 University of Potsdam Anglistik Amerikanistik course English Cultural an Media Studies language English abstract The 1990s was a very productive decade for the British film industry It is the continuation of the so called renaissance in British film which started in the 1980s Films of those years were noted for their realism their simplicity their absence of special effects and their originality and often politically socially and or ethnically motivated One of the British directors renowned for precisely this kind of filmmaking is Kenneth Loach who adhered to his realistic approach to filmmaking from the 1960s through to the 1990s and applied it both to the television and the cinema screen After a less productive decade during the 80s when he turned to documentaries rather than feature films most of which never made it to the screen under the politics and censorship of the Thatcher government he experienced a comeback in the 1990s Even if his style developed over the decades of his career his main aim to show the life of the British working class has remained consistent Critics generally refer to Loach as a realist or naturalist filmmaker terms which Loach himself would rather substitute with authentic which to him seems a less loaded word than naturalistic or realistic So what is he A realist a naturalist or should one create a new term as has been suggested and call his filmmaking Loachian to do justice to his unique style Could one define such a thing as Loachism rather than realism and naturalism Loach s style can be regarded as a continuum within realist traditions of filmmaking From the early beginnings of cinema realism constituted an important part of the new medium Critics and filmmakers alike engaged in discussions on the realist issue Is cinema real Does it show l

The Cambridge Companion to American Realism and Naturalism Donald Pizer, 1995-06-30 This Companion examines a number of issues related to the terms realism and naturalism The introduction seeks both to discuss the problems in the use of these two terms in relation to late nineteenth century fiction and to describe the history of previous efforts to make the terms expressive of American writing of this period The Companion includes ten essays which fall into four categories essays on the historical context of realism and naturalism by Louis Budd and Richard Lehan essays on critical

approaches to the movements since the early 1970s by Michael Anesko essays on the efforts to expand the canon of realism and naturalism by Elizabeth Ammons and a full scale discussion of ten major texts from W D Howell s *The Rise of Silas Lapham* to Jack London s *The Call of the Wild* by John W Crowley Tom Quirk J C Levenson Blanche Gelfant Barbara Hochman and Jacqueline Tavernier Courbin *Realism, Naturalism, and Local Color, 1865-1917* Matthew Joseph Bruccoli, Richard Layman, 1988 Concise Dictionary of American Literary Biography covers only the American authors most frequently studied in high school and college literature courses It extracts and fully updates essays in their entirety from the much larger Dictionary of Literary Biography series The 6 vol set begins each entry with a helpful chart that instantly shows the important places influences and relationships literary movements major themes cultural and artistic influences and social and economic influences that most affected the featured author s work The set is organized chronologically Each volume is devoted to a single historical period covering 30 40 representative writers from all genres They include Colonization to the American Renaissance 1640 1865 Realism Naturalism and Local Color 1865 1917 The Twenties 1917 1929 The Age of Maturity 1929 1941 The New Consciousness 1941 1968 Broadening Views 1968 1988 The Supplement to the 6 vol set Modern American Writers provides additional information on 20th century authors featured in the original volumes *Realism, Naturalism, and Symbolism* Roland N. Stromberg, 1968 **Naturalism** Lilian R. Furst, Peter N. Skrine, 2017-07-06 First published in 1971 this book examines the literary style of Naturalism After introducing the reader to the term itself including its history and its relationship to Realism it goes on to trace the origins of the Naturalist movement as well as particular groups which adhered to Naturalism and the theories they espoused It also provides a summary of the key Naturalist literary works and concludes with a brief reflection on the movement as a whole This book will be of interest to those studying nineteenth and early twentieth century literature **Realism's Others** Eva Aldea, Geoffrey Baker, 2010-07-12 For at least a century scholarship on realist narrative and occasional polemics against realist narrative have assumed that realism promotes the values of sameness against those of otherness and that it does so by use of a narrative mode that excludes certain epistemologies ideologies and ways of thinking However the truth is more complex than that as the essays in this volume all demonstrate Realism s Others examines the various strategies by which realist narratives create the idea of difference whether that difference is registered in terms of class ethnicity epistemology nationality or gender The authors in this collection examine in detail not just the fact of otherness in some canonical realist and canonical magical realist and postmodern novels but the actual means by which that otherness is established by the text These essays suggest that neither realist narrative nor narratives positioned as anti realist take otherness for granted rather the texts discussed here actively create difference and this creation of difference often occasions severe difficulties for the novels representational schema How does one represent different types of knowledge other aesthetic modes or other spaces for example in texts whose epistemology has long been seen as secular and empirical whose aesthetic mode has always been approached as pure

descriptive mimesis and whose settings are largely domestic These essays all begin with a certain collision of nationalities of classes of representational matrices of religions and go on to chart the challenges that this collision presents to our ideas or stereotypes of realism or to the possibilities of writing against and beyond realism This question motivates examination of key realist or social realist texts in some of these essays by Honoré de Balzac George Eliot Franz Grillparzer Theodor Storm Gottfried Keller Theodor Fontane Wilhelm Raabe María Amparo Ruiz de Burton Henry James William Dean Howells Charles Chesnutt Theodore Dreiser H T Tsiang Alan Sillitoe and Richard Yates However it is no less central a question in certain non realist texts which engage realist aims to a surprising degree often to debate them openly some of these essays discuss in this light fantastic magical realist and postmodern works by Abram Tertz Paul Auster Alejo Carpentier Toni Morrison Gabriel García Márquez Salman Rushdie and A S Byatt Realism becomes more than an aesthetic aim or narrative mode It becomes rather a value evoked and discussed by all of the works analyzed here in order to reveal its impact on fiction's treatment of ethnicity nationality ideology space gender and social class

The Cambridge Companion to American Realism and Naturalism Donald Pizer, 2012 The terms realism and naturalism are considered in the context of expressing a style of American writing in relation to late 19th century fiction movements This text analyzes ten major texts from W D Howell's *The Rise of Silas Lapham* to Jack London's *The Call of the Wild*

[Haunting Realities](#) Monika Maria Elbert, Wendy Ryden, 2017 *Haunting Realities* Naturalist Gothic and American Realism is an innovative collection of essays examining the sometimes

paradoxical alignment of Realism and Naturalism with the Gothic in American literature to highlight their shared qualities Following the golden age of British Gothic in the late eighteenth century the American Gothic s pinnacle is often recognized as having taken place during the decades of American Romanticism However *Haunting Realities* explores the period of American Realism the end of the nineteenth century to discover evidence of fertile ground for another age of Gothic proliferation At first glance Naturalist Gothic seems to be a contradiction in terms While the Gothic is known for its sensational effects with its emphasis on horror and the supernatural the doctrines of late nineteenth century Naturalism attempted to move away from the aesthetics of sentimentality and stressed sobering mechanistic views of reality steeped in scientific thought and the determinism of market values and biology Nonetheless what binds Gothicism and Naturalism together is a vision of shared pessimism and the perception of a fearful lingering presence that ominously haunts an impending modernity Indeed it seems that in many Naturalist works reality is so horrific that it can only be depicted through Gothic tropes that prefigure the alienation and despair of modernism In recent years research on the Gothic has flourished yet there has been no extensive study of the links between the Gothic and Naturalism particularly those which stem from the early American Realist tradition *Haunting Realities* is a timely volume that addresses this gap and is an important addition to scholarly work on both the Gothic and Naturalism in the American literary tradition
