Realistic Rationalism Representation And Mind:

Realistic Rationalism Jerrold J. Katz, 1997-12-08 Jerrold Katz develops a new philosophical position integrating realism and rationalism In Realistic Rationalism Jerrold J Katz develops a new philosophical position integrating realism and rationalism Realism here means that the objects of study in mathematics and other formal sciences are abstract rationalism means that our knowledge of them is not empirical Katz uses this position to meet the principal challenges to realism In exposing the flaws in criticisms of the antirealists he shows that realists can explain knowledge of abstract objects without supposing we have causal contact with them that numbers are determinate objects and that the standard counterexamples to the abstract concrete distinction have no force Generalizing the account of knowledge used to meet the challenges to realism he develops a rationalist and non naturalist account of philosophical knowledge and argues that it is preferable to contemporary naturalist and empiricist accounts The book illuminates a wide range of philosophical issues including the nature of necessity the distinction between the formal and natural sciences empiricist holism the structure of ontology and philosophical skepticism Philosophers will use this fresh treatment of realism and rationalism as a starting point for new directions in their own research

Furnishing the Mind Jesse J. Prinz, 2004-08-20 Western philosophy has long been divided between empiricists who argue that human understanding has its basis in experience and rationalists who argue that reason is the source of knowledge A central issue in the debate is the nature of concepts the internal representations we use to think about the world The traditional empiricist thesis that concepts are built up from sensory input has fallen out of favor Mainstream cognitive science tends to echo the rationalist tradition with its emphasis on innateness In Furnishing the Mind Jesse Prinz attempts to swing the pendulum back toward empiricism Prinz provides a critical survey of leading theories of concepts including imagism definitionism prototype theory exemplar theory the theory theory and informational atomism He sets forth a new defense of concept empiricism that draws on philosophy neuroscience and psychology and introduces a new version of concept empiricism called proxytype theory He also provides accounts of abstract concepts intentionality narrow content and concept combination In an extended discussion of innateness he covers Noam Chomsky's arguments for the innateness of grammar developmental psychologists arguments for innate cognitive domains and Jerry Fodor's argument for radical concept nativism

Austere Realism Terence E. Horgan, Matjaz Potrc, 2009-08-21 A provocative ontological cum semantic position asserting that the right ontology is austere in its exclusion of numerous common sense and scientific posits and that many statements employing such posits are nonetheless true The authors of Austere Realism describe and defend a provocative ontological cum semantic position asserting that the right ontology is minimal or austere in that it excludes numerous common sense posits and that statements employing such posits are nonetheless true when truth is understood to be semantic correctness under contextually operative semantic standards Terence Horgan and Matjaz Potrc argue that austere realism emerges naturally from consideration of the deep problems within the naive common sense approach to truth

and ontology They offer an account of truth that confronts these deep internal problems and is independently plausible contextual semantics which asserts that truth is semantically correct affirmability Under contextual semantics much ordinary and scientific thought and discourse is true because its truth is indirect correspondence to the world After offering further arguments for austere realism and addressing objections to it Horgan and Potrč consider various alternative austere ontologies They advance a specific version they call blobjectivism the view that the right ontology includes only one concrete particular the entire cosmos the blobject which although it has enormous local spatiotemporal variability does not have any proper parts The arguments in *Austere Realism* are powerfully made and concisely and lucidly set out The authors contentions and their methodological approach products of a decade long collaboration will generate lively debate among scholars in metaphysics ontology and philosophy

Time and Realism Yuval Dolev, 2007-10-05 A new view of the metaphysics of time arguing that the traditional tensed tenseless debate within analytic philosophy should be seen as the first stage in a philosophical investigation of time and that the next stage belongs to phenomenology How does time pass Does time itself move or is time's passage merely an illusion Analytic philosophers belong for the most part to one of two camps on this question the tensed camp which defends the reality of time's passage conceiving the present as ontologically privileged over the past and future and the tenseless camp which denies time's passage and holds that all events whatever their temporal location are ontologically equal In *Time and Realism* Yuval Dolev goes beyond the tensed tenseless debate to argue that neither position is conclusive but that the debate over them should be seen as only the first stage in the philosophical investigation of time The next stage he claims belongs to phenomenology and he argues further the phenomenological analysis of time grows naturally out of the analytic enterprise Dolev shows that the two rival theories share a metaphysical presupposition that tense concerns the ontological status of things He argues that this ontological assumption is natural but untenable and that leaving it behind creates a new viewpoint from which to study central topics in the metaphysics of time Dolev shows that such a study depends on the kind of meticulous attention to our firsthand experiences that drives phenomenological investigations Thus he argues phenomenology is the venue for advancing the investigation of time *Time and Realism* not only analyzes the tensed tenseless debate resolving some of its central difficulties along the way it transcends it It serves as a bridge between the analytic and the continental traditions in the philosophy of mind both of which are shown to be vital to the philosophical examination of time

Brainchildren Daniel C. Dennett, 1998-02-17 A new collection of wide ranging essays from one of cognitive science's most distinguished figures Minds are complex artifacts partly biological and partly social only a unified multidisciplinary approach will yield a realistic theory of how they came into existence and how they work One of the foremost workers in this multidisciplinary field is Daniel Dennett This book brings together his essays on the philosophy of mind artificial intelligence and cognitive ethology that appeared in inaccessible journals from 1984 to 1996 Highlights include *Can Machines Think* *The Unimagined*

Preposterousness of Zombies Artificial Life as Philosophy and Animal Consciousness What Matters and Why Collected in a single volume the essays are now available to a wider audience *The Mind Doesn't Work that Way* Jerry A. Fodor, 2000

Jerry Fodor argues against the widely held view that mental processes are largely computations that the architecture of cognition is massively modular and that the explanation of our innate mental structure is basically Darwinian **Mind in a Physical World** Jaegwon Kim, 2000 This book based on Jaegwon Kim's 1996 Townsend Lectures presents the philosopher's current views on a variety of issues in the metaphysics of the mind in particular the mind body problem mental causation and reductionism This book based on Jaegwon Kim's 1996 Townsend Lectures presents the philosopher's current views on a variety of issues in the metaphysics of the mind in particular the mind body problem mental causation and reductionism Kim construes the mind body problem as that of finding a place for the mind in a world that is fundamentally physical Among other points he redefines the roles of supervenience and emergence in the discussion of the mind body problem Arguing that various contemporary accounts of mental causation are inadequate he offers his own partially reductionist solution on the basis of a novel model of reduction Retaining the informal tone of the lecture format the book is clear yet sophisticated
