Reality Of Time:

The Language and Reality of Time Thomas Sattig, 2006-05-11 Thomas Sattig's book develops a comprehensive framework for doing philosophy of time. He brings together a variety of different perspectives linking our ordinary conception of time with the physicist's conception and linking questions about time addressed in metaphysics with questions addressed in the philosophy of language. Within this framework Sattig explores the temporal dimension of the material world in relation to the temporal dimension of our ordinary discourse about the world. The discussion is centred around the dispute between three dimensionalists and four dimensionalists about whether the temporal profile of ordinary objects mirrors their spatial profile. Are ordinary objects extended in time in the same way in which they are extended in space? Do they have temporal as well as spatial parts? Four dimensionalists say yes, three dimensionalists say no. Sattig develops an original three dimensionalist picture of the material world and argues that this picture is preferable to its four dimensionalists' rivals. If ordinary thought and talk are taken seriously. Among the issues that Sattig discusses are the metaphysics of persistence, change, composition, location, coincidence, and relativity, the ontology of past, present, and future, and the semantics of predication, tense, temporal modifiers, and sortal terms.

Critique of Pure Reason Immanuel Kant, 1781. Metaphysicians have for centuries attempted to clarify the nature of the world and how rational human beings construct their ideas of it. Materialists believed that the world, including its human component, consisted of objective matter, an irreducible substance to which qualities and characteristics could be attributed. Mind, thoughts, ideas, and perceptions were viewed as a more sophisticated material substance. Idealists, on the other hand, argued that the world acquired its reality from mind, which breathed metaphysical life into substances that had no independent existence of their own. These two camps seemed deadlocked until Immanuel Kant's *Critique of Pure Reason* endeavored to show that the most accurate theory of reality would be one that combined relevant aspects of each position yet transcended both to arrive at a more fundamental metaphysical theory. Kant's synthesis sought to disclose how human reason goes about constructing its experience of the world, thus intertwining objective stimuli with rational processes that arrive at an orderly view of nature.
