*Realizing the University* Ronald Barnett, 1999-12-16 The university has lost its way The world needs the university more than ever but for new reasons If we are to clarify its new role in the world we need to find a new vocabulary and a new sense of purpose The university is faced with supercomplexity in which our very frames of understanding action and self identity are all continually challenged In such a world the university has explicitly to take on a dual role firstly of compounding supercomplexity so making the world ever more challenging and secondly of enabling us to live effectively in this chaotic world Internally too the university has to become a new kind of organization adept at fulfilling this dual role The university has to live by the uncertainty principle it has to generate uncertainty to help us live with uncertainty and even to revel in our uncertainty Ronald Barnett offers nothing less than a fundamental reworking of the way in which we understand the modern university *Realizing the University* is essential reading for all those concerned about the future of higher education
