## **Reardon Smith Line The History Of A South Wales Shipping Venture:**

Reardon Smith Line Paul Michael Heaton,1984      **The Evolution and Significance of the Powered Bulk Carrier**

Roy Fenton,2023-04-03 The book is the first to detail the 170 year evolution of the powered bulk carriers which continue to have a major role in the world s trades and economies Their design and technological development is traced from the screw colliers of the 1850s which revolutionised the British coastal coal trade The same engineering principles were applied to produce ocean going steam and later motor tramps By the end of the 19th century the capabilities and economies of these black freighters had captured from the sailing ship much of the world s trade in bulk commodities In the second half of the 20th century the tramps in turn evolved into multi purpose dry bulk carriers These workhorses of the sea transport commodities including metallic ores grain coal timber and other minerals Quantities of up to 400 000 tons are carried in the largest specialised ore carriers In a parallel development applying the same technical principles produced smaller yet efficient steam and later motor coasters which came to dominate short sea shipping The book concludes with a discussion of how the economies of transportation provided by bulk carriers have had profound effects on industrialisation globalisation and the world s economy and discusses the environmental impact of these ships      **Shipowners of Cardiff** David

Jenkins,2013-07-15 From 1875 to the present day the Cardiff and Bristol Channel Incorporated Shipowners Association has been the representative body for shipowners in Cardiff and other Bristol Channel ports This study looks at some of the most representative periods in its history the reaction of the Association to the proposal to build new docks in Barry in the 1880s the Seaman s Strike in 1911 and the schism which split the Association in 1912 14 David Jenkins also reveals that a barrage across the estuary of the rivers Taff and Ely was first proposed as early as 1920 Nothing came of that proposal but in 1929 a similar scheme was once more under consideration comprising a dam with two locks across the tidal channel between Penarth Head and Queen Alexandra lock      Landmark Cases in the Law of Contract Charles Mitchell,Paul

Mitchell,2008-05-30 Landmark Cases in the Law of Contract offers twelve original essays by leading contract scholars As with the essays in the companion volume Landmark Cases in the Law of Restitution Hart 2006 each essay takes as its focus a particular leading case and analyses that case in its historical or theoretical context The cases range from the early eighteenth to the late twentieth centuries and deal with an array of contractual doctrines Some of the essays call for their case to be stripped of its landmark status whilst others argue that it has more to offer than we have previously appreciated The particular historical context of these landmark cases as revealed by the authors often shows that our current assumptions about the case and what it stands for are either mistaken or require radical modification The book also explores several common themes which are fundamental to the development of the law of contract for instance the influence of commercial expectations appeals to reason and the significance of particular judicial ideologies and techniques      **Tramp**

**Ships** Roy Fenton,2013-11-13 With 300 stunning photographs this pictorial history of tramp trade ships illustrates the

evolution of these charming itinerant merchant vessels The tramp ship was the taxi of the seas With no regular schedules it voyaged anywhere and everywhere picking up and dropping off cargoes mainly bulk cargoes such as coal grain timber china clay and oil Older and slower vessels tended to find their way into this trade hence the tag tramp but new tramps were also built for the purpose In this beautiful volume featuring 300 photographs Roy Fenton illustrates the Tramp Ship s evolution over the course of more than 100 years from the 1860s when the steam tramp developed from the screw collier until it was largely replaced by the specialist bulk carrier in the 1980s Fenton offers fascinating background information on the design and building of tramps He describes the machinery from simple triple expansion turbines to diesel engines Their operation and management and the life of the officers and crews are also covered This illustrated history journeys through the last years of the 19th century the two world wars and the postwar years Photo captions provide each ship s dimensions owners and builder Each ship s career is outlined with notes on trades and how they changed over a ship s lifetime **A**
