Reasons For Action Toward A Normative Theory And Meta Level Criteria:

Reasons for Action B.C. Postow, 2013-03-09 2 first person point of view I acknowledge these possible handicaps and try to overcome them Other people may coherently judge that I am incapable of figuring out correctly what I rationally ought to do or they may inform me of reasons of which I had heretofore been ignorant or they may try to help me overcome intellectual hindrances Like me these people would be assuming that the goal is to identify what I really rationally ought to do Nevertheless we are concerned with reasons for the agent to act in a certain way rather than with reasons say for someone to want it to be the case that the agent act Thus to be a reason in our sense is to be a consideration which has an appropriate guiding role to play in the agents deliberation An agent is guided by reasons if she determines what to do in light of the reasons Suppose then that a normative theory says that it is supremely desirable or that it rationally ought to be the case that agents act in a way that maximizes the general utility but that since the general utility is never in fact maximized by those who pay attention to it considerations of the general utility should play no role in the agents deliberation Such a theory would not be said to ascribe to agents a reason to maximize the general utility on our usage Inherent and Instrumental Values G. John M. Abbarno, 2014-12-10 The essays in this book range broadly over different aspects of value theory and include contributions by Nicholas Rescher Frances Kamm Barry Smith and Jan Narveson Portions examine the theoretical foundations of values and valuation exploring the rational groundwork for judgments Other aspects appealing to value distinctions of inherent intrinsic and instrumental drawn most notably by C I Lewis bring to light matters of aesthetic social political ethical and ontological issues Throughout *Inherent and Instrumental Values* the authors address questions assessing the intrinsic worth of utility of actions and whether manual or professional labor can hold an equal value rating and the implications of this assessment In other portions of the anthology authors explore the extent to which such value categories above help clarify and assess moral issues we encounter in everyday life Among some analyzed in this book are racism and affirmative action abortion euthanasia homelessness care and friendship The theme of the nature of value and the role of valuation we encounter in the days of our life provide a basis for examining other aspects of axiology that lie beyond the scope of this work *Action and Responsibility* Andrew Sneddon, 2006-01-27 This book is an exploration of what it takes for an event to count as an action I first became interested in this topic nearly a decade ago while working on a different topic I kept coming across philosophers making claims about the nature of action that seemed false or at least dubious to me As a consequence I turned to the philosophy of action directly to get to the heart of the matter I have wrestled with this territory ever since I hope that with this book I have finally earned the intuitions that put me at odds with the philosophers I was originally reading This book develops ideas in Part Two of my doctoral dissertation which I wrote at Queen s University in Kingston Ontario Canada I loved being at Queen s for both professional and personal reasons My thanks go to the Social Sciences and Humanities Research Council of Canada for financial support as a doctoral candidate Steve Leighton and

Ronald de Sousa were readers for my dissertation They provided some early and invaluable challenges to the ideas developed here My deepest debt of gratitude is owed to David Bakhurst my supervisor I learned a lot from David this book would not be the same without his help **Nursing Ethics and Professional Responsibility in Advanced Practice** Pamela J.

Grace,Melissa K. Uveges,2022-08-08 Nursing Ethics and Professional Responsibility in Advanced Practice Fourth Edition remains the only comprehensive textbook available on the ethical issues faced by APNs providing front line care It introduces the foundations of professional responsibility and makes difficult philosophical and ethical concepts accessible to students so they can facilitate their own ethical decision making The authors an APN and ethicist demystifies the principles and language of healthcare ethics Beginning from a foundation of nursing practice this unique resource guides students in developing ethical decision making skills they can apply to a range of circumstances from everyday issues to complex dilemmas The updated Fourth Edition features expanded information on social justice including advocacy for vulnerable populations and global issues as well as new discussions on managing social media electronic health records and ethical issues specific to CRNAs and CNSs **Contemporary Debates in Social Philosophy** Laurence Thomas,2009-02-04 In this important and

engaging volume international scholars present opposing viewpoints to debate ten of the most important issues in contemporary social philosophy Provides an original analysis of some of society s most pressing issues Written by an outstanding cast of international scholars Issues covered include the nature of freedom the limits of religious tolerance affirmative action parenting the death penalty privacy violence world hunger social diversity homosexuality and abortion Invites the reader to participate in the exchange of arguments The Repugnant Conclusion Jesper Ryberg,Torbjörn

Tännsjö,2007-11-10 Most people including moral philosophers when faced with the fact that some of their cherished moral views lead up to the Repugnant Conclusion feel that they have to revise their moral outlook However it is a moot question as to how this should be done It is not an easy thing to say how one should avoid the Repugnant Conclusion without having to face even more serious implications from one s basic moral outlook Several such attempts are presented in this volume This is the first volume devoted entirely to the cardinal problem of modern population ethics known as The Repugnant Conclusion This book is a must for moral philosophers with an interest in population ethics *Transforming Unjust Structures* Severine

Deneulin,Mathias Nebel,Nicholas Sagovsky,2006-07-06 S VERINE DENEULIN MATHIAS NEBEL AND NICHOLAS SAGOVSKY TRANSFORMING UNJUST STRUCTURES The Capability Approach THE CAPABILITY APPROACH Structural injustice has traditionally been the concern of two major academic disciplines economics and philosophy The dominant model of economics has long been that of neo classical economics For neo classical economists human we being is to be assessed by the availability of disposable income or according to goods consumed it is measured by the levels of utility achieved in the consumption of commodities Social order is fashioned by the ways consumers maximise their 1 well being and enterprises maximise their profits A core assumption is that all 2 commodities are commensurable they can all be measured according to

a single 3 numerical covering value which is their price Within this neo classical paradigm justice is achieved when the utility level of someone cannot be increased without 4 another person seeing his or her utility level decrease The dominant paradigm of neo classical economics was strongly challenged when development and welfare economist Amartya Sen received the Nobel Prize for Economics in 1998 His work offered an alternative to the neo classical evaluation of human well being in the utility commodity space The underlining philosophical intuition behind Sen s work is that the standard of living lies in the living and not in the consumption of commodities In searching for an alternative measure of human well being Sen devised his capability approach
