**Proceedings: Recent advances in primatology** Clarence Ray Carpenter, H. O. Hofer, 1969 *Recent Advances in Primatology* International Primatological Society, 1978 Recent Advances in Primatology International Primatological Society. Congress, 1978 Recent Advances in Primatology: Chivers, D. J. and Ford, E. H. R. Medicine David John Chivers, 1978 **Recent advances in primatology : [sixth congress of the International primatological society, between August 22nd and 28th 1976 ... University of Cambridge, England]** David John Chivers, J. Herbert (Ph.D.), 1978 Recent Advances in Primatology, 1978 *Primate Evolutionary Biology* A.B. Chiarelli, R.S. Corruccini, 2012-12-06 The VIIIth International Congress of the International Primatological Society was held from 7 through 11 July 1980 in Florence Italy under the auspices of the host institution the Istituto di Antropologia of the University of Florence More than 300 papers and abstracts were presented either at the main Congress or in 14 pre Congress symposia the week earlier so scheduled to avoid conflict with either the main invited lectures or the contributed paper sessions This volume consists of the contributed papers on primate evolutionary biology primarily functional morphology evolution and paleontology This is a coherent though broad and important sub field of primatology We have thus focused the subject in agreement with the publishers to help ensure a successful and useful volume befitting these very current contributions from the biennial meeting of the International Primatological Society Furthermore we have compiled this volume in a fairly unprecedented manner for congress proceedings In view of space and budget limitations and the need to guarantee a high quality book with appeal for specialists we subjected all manuscript to a four stage internal review process and selected only the best 13 of 31 This rejection rate of 58% compares with the more discriminating reviewed scholarly journals Too often primatological or anthropological proceedings have been heterogeneous large unselective volumes that at least recently have repeatedly lost money for the publishing house in sometimes spectacular amounts *Primate Evolution and Human Origins* Russell L. Ciochon, 2017-09-08 *Primate Evolution and Human Origins* compiles for the first time the major ideas and publications that have shaped our current view of the evolutionary biology of the primates and the origin of the human line Designed for freshmen to graduate students in anthropology paleontology and biology the book is a unique collection of classic papers culled from the past 20 years of research It is also an important reference for academicians and researchers as it covers the entire scope of primate and human evolution with an emphasis on the fossil record A comprehensive bibliography cites over 2000 significant articles not found in the main text **Recent Literature of Mammalogy**, 1979 Supplement for Feb 1974 includes Proposed revisions of society bylaws and rules *Recent Advances in Primatology* David John Chivers, 1978-01-01 *Primate Locomotion* Elizabeth Strasser, John Fleagle, Alfred L. Rosenberger, Henry McHenry, 2013-06-29 The study of primate locomotion is a unique discipline that by its nature is interdisciplinary drawing on and integrating research from ethology ecology comparative anatomy physiology biomechanics paleontology etc When combined and focused on particular problems

this diversity of approaches permits unparalleled insight into critical aspects of our evolutionary past and into a major component of the behavioral repertoire of all animals Unfortunately because of the structure of academia integration of these different approaches is a rare phenomenon For instance papers on primate behavior tend to be published in separate specialist journals and read by subgroups of anthropologists and zoologists thus precluding critical syntheses In the spring of 1995 we overcame this compartmentalization by organizing a conference that brought together experts with many different perspectives on primate locomotion to address the current state of the field and to consider where we go from here The conference Primate Locomotion 1995 took place thirty years after the pioneering conference on the same topic that was convened by the late Warren G Kinzey at Davis in 1965 International Journal of Primatology ,2004 *Mammals of Africa: Volume II* Jonathan Kingdon,2014-11-20 Mammals of Africa MoA is a series of six volumes which describes in detail every currently recognized species of African land mammal This is the first time that such extensive coverage has ever been attempted and the volumes incorporate the very latest information and detailed discussion of the morphology distribution biology and evolution including reference to fossil and molecular data of Africa's mammals With more than 1 160 species and 16 18 orders Africa has the greatest diversity and abundance of mammals in the world The reasons for this and the mechanisms behind their evolution are given special attention in the series Each volume follows the same format with detailed profiles of every species and higher taxa The series includes hundreds of colour illustrations and pencil drawings by Jonathan Kingdon highlighting the morphology and behaviour of the species concerned as well as line drawings of skulls and jaws by Jonathan Kingdon and Meredith Happold Every species also includes a detailed distribution map Edited by Jonathan Kingdon David Happold Tom Butynski Mike Hoffmann Meredith Happold and Jan Kalina and written by more than 350 authors all experts in their fields Mammals of Africa is as comprehensive a compendium of current knowledge as is possible Extensive references alert readers to more detailed information Volume II is edited by Thomas Butynski Jonathan Kingdon and Jan Kalina and contains profiles of 93 species of primates this includes the great apes Old World monkeys lorises and galagos **Recent Advances in Primatology** David John Chivers,1978 **Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur** ,1981 Recent Progress of Natural Sciences in Japan ,1983 *Current Perspectives in Primate Social Dynamics* David Milton Taub,Frederick A.
