Recent Advances In The Modeling Of Hydrologic Systems:

Recent Advances in the Modeling of Hydrologic Systems D.S Bowles,P. Enda O'Connell,2012-12-06 Modeling of the rainfall runoff process is of both scientific and practical significance Many of the currently used mathematical models of hydrologic systems were developed a generation ago Much of the effort since then has focused on refining these models rather than on developing new models based on improved scientific understanding In the past few years however a renewed effort has been made to improve both our fundamental understanding of hydrologic processes and to exploit technological advances in computing and remote sensing It is against this background that the NATO Advanced Study Institute on Recent Advances in the Modeling of Hydrologic Systems was organized The idea for holding a NATO ASI on this topic grew out of an informal discussion between one of the co directors and Professor Francisco Nunes Correia at a previous NATO ASI held at Tucson Arizona in 1985 The Special Program Panel on Global Transport Mechanisms in the Geo Sciences of the NATO Scientific Affairs Division agreed to sponsor the ASI and an organizing committee was formed The committee comprised the co directors Professor David S Bowles U S A and Professor P Enda O Connell U K and Professor Francisco Nunes Correia Portugal Dr Donn G DeCoursey U S A and Professor Ezio Todini Italy **Geotitles** ,1992 *Scale Issues in Hydrological Modelling* J. D. Kalma,M. Sivapalan,1995-09-11 There is a growing need for appropriate models which address the management of land and water resources and ecosystems at large space and time scales Theories of non linear hydrological processes must be extrapolated to large scale three dimensional natural systems such as drainage basins flood plains and wetlands This book reports on recent progress in research on scale issues in hydrological modelling It brings together 27 papers from two special issues of the journal Hydrological Processes The book makes a significant contribution towards developing research strategies for linking model parameterisations across a range of temporal and spatial scales The papers selected for this book reflect the tremendous advances which have been made in research into scale issues in hydrological modelling during the last ten years Advances in Hillslope Processes, Volumes 1 and 2 Malcolm G. Anderson,Susan M. Brooks,1996 Deals in detail with the full range of elements appropriate to hillslope research It develops several key themes in an attempt to bring together the very latest advances in hillslope research Hydrological solute soil gully and slope stability processes together with processes in tropical semi arid and periglacial environments are all accorded major sections in the book Written by internationally renowned experts in the field it brings together recent innovative advances in both modelling and field monitoring Hugely valuable publication that not only makes an impressive statement on or contemporary knowledge and methodology but also sets up a well defined platform for future work Progress in Physical Geography Vol 21 4 1997 *Geoscience Documentation* ,1991 **Proceedings of the International Symposium on Water Quality Modeling of Agricultural Non-Point Sources** ,1990 Knowledge for Sustainable Development Unesco,2002 **Directory of Published Proceedings** ,1996 **Water Quality Modeling** American Society of Agricultural
