## **Recent Advances In Liquid Crystalline Polymers:**

**Recent Advances in Liquid Crystalline Polymers** L. L. Chapoy, 2012-12-06 This volume contains an eclectic collection of 22 papers on liquid crystalline polymers presented at the Sixth Polymer Workshop in the series sponsored by the European Science Foundation entitled Liquid Crystal Polymer Systems in Gentofte Denmark 12-14 September 1983 Since a contribution to this volume was strictly voluntary and in some cases represents a considerably expanded version of that which was presented it is strictly speaking not correct to term this a proceedings A description of the aims and purposes of the European Science Foundation with respect to the polymer area has been presented in Shell Polymers Vol 5 No 2 pp 34-35 1981 The papers given here represent a cross section of current research interests in liquid crystalline polymers in the areas of theory synthesis characterization structure property relationships and applications At least some of the current interest is motivated by attempts to practically exploit the novel properties of these materials in the developing technologies of high strength fibres and advanced materials for constructional purposes but also for functional materials in the areas of information retrieval electronics and optoelectronics applications The editor wishes to thank all those involved for their courtesy and cooperation
