The Power of Cities in International Relations Simon Curtis, 2014-04-16 Cities have become increasingly important to global politics but have largely occupied a peripheral place in the academic study of International Relations IR This is a notable oversight for the discipline although one which may be explained by IR's traditional state centrism the subjugation of the city to the demands of the territorial state in the modern period and a lack of conceptual and analytical frameworks that can allow scholars to include the impact of cities within their work Presenting case specific scholarship from leading experts in the field each contribution guides the reader through the changing nature of cities in the international system and their increasing prominence in global governance outcomes The book features case studies on the financial power of cities city action in the security domain collaboration of cities in coping with environmental problems transnational urban regions and mayors as international actors to illustrate if the relationship between the city and the state has changed in profound ways and how cities are empowered by structural changes in world politics The multidisciplinary and global focus in *The Power of Cities in International Relations* sheds much needed light on the significance of the reemergence of cities from the long shadow of the nation state Only by examining the mechanisms that have empowered cities in the last few decades can we understand their new functions and capabilities in global politics

The International Economic Crisis and the Post-Soviet States Valentina Feklyunina, Stephen White, 2014-06-11 At first it seemed as if the international financial crisis that broke out in 2008 would have little effect in Russia and the other post Soviet states But by the end of the year growth was slowing banks were reluctant to lend share values had collapsed and unemployment was rising inexorably The stability of the Putin leadership it appeared had been built on the turnaround in economic performance that it had managed to achieve over more than a decade How would it cope with a sudden reversal In Ukraine living standards fell even more sharply In Belarus there were fewer obvious signs of economic difficulty but it could hardly be unaffected by the performance of its major trading partners Drawing on a wide range of evidence an international group of scholars address the impact of the international

financial crisis in the post Soviet states and the continuing implications of the crisis for these countries themselves and for the wider world This book was published as a special issue of the Journal of Communist Studies and Transition Politics now known as East European Politics

Global Financial Crisis And Challenges For China Mu Yang,Michael Siam-heng Heng,2012-07-25 The book analyzes the nature of Chinese economy which enables it to go through the financial tsunami pretty unscathed It discusses the stimulus package designed by the Chinese government to keep the economy on course as well as its results both positive and negative aspects in the middle and long term The 2008 09 financial crisis makes it very clear that we need a two pronged approach to deal with the situation namely governments need a to take quick and decisive actions to stem any further deterioration in financial systems b to revamp their economies by refitting existing engines in the real economy China as the third largest economy in the world and with its robust domestic consumption and a healthy financial system is one of the most important drivers to pull the world out of recession According to the Chinese leadership China s main contribution is to keep its own economy running smoothly In response to the crisis the Beijing government has poured money into the following sectors public housing earthquake reconstruction physical infrastructure social security education and healthcare So far the results have helped China to maintain the targeted high growth Given the open nature of its economy its high growth has also benefited other countries thereby contributing to the global economy The current crisis strengthens a trend that has emerged since the Asian financial crisis of 1997 And that is the enhanced economic integration of China with its East Asian neighbours and Southeast Asia This augurs well for East Asian regionalism which may include the birth of Asian Monetary Fund The global environment in the wake of the crisis poses new challenges to China for example in the form of shrinking size of its traditional export market in the USA and Europe China needs to modify its strategy from previous export oriented and investment driven strategy into one with more emphasis on consumption There is a lot of scope for China to embark on productive consumption such as cleaning up the environment physical infrastructure social security education and healthcare If done well they will lay a firm basis for long term economic development It represents an occasion for China to embark on a nation wide effort to upgrade its economy in the key sectors At the same time attention needs to be paid to improving economic legal institutional framework to support China s role as a major global player

Foreign Aid in a World in Crisis Viktor Jakupec,Max Kelly,John McKay,2024-02-29 This book investigates the geopoliticisation of foreign aid in recent years against a background of global overarching crises such as climate change conflict Covid 19 economic crisis energy shortages and migration Foreign aid has historically been understood as assisting both with the development objectives of the recipients and with the trade and geopolitical interests of the donors In the first decades of the 21st century however this balance has been shifted by a series of complex global challenges This book argues that donors have now moved towards framing aid as a geopolitical instrument wherein aid can be given or withheld based on power or political intent thus imposing the donor s specific values and norms This book provides an in depth analysis of this weaponisation of

foreign aid within a framework of global disruption and ultimately concludes that the world is at a tipping point towards a new socio political world order Asking important questions about the power dynamics at play within the aid sector this book will be an important read for researchers across development studies political science international relations and global affairs *The international trade law journal* ,1981 Power in a Changing World Economy Benjamin J. Cohen, Eric M.P. Chiu, 2013-10-30 This book is about power in a changing world economy Though power is ubiquitous in the study of International Political Economy the concept is underdeveloped in formal theoretical terms This collection of essays analyses recent experience in East Asia to advance our theoretic understanding of state power in IPE Over the last quarter century no other region of the world has had a greater impact on the global distribution of economic resources and capabilities China with its peaceful rise now stands as the second largest national economy on the face of the earth South Korea and Taiwan have become industrial powerhouses Hong Kong and Singapore are among the world s most important financial centres and new poles of growth have emerged in several southeast Asian countries all while Japan long the region s dominant market has slipped into seemingly irreversible decline The volume s nine essays contributed by leading scholars in the United States Britain and Taiwan aim to extract relevant inferences and insights from these developments for the study of state power All are framed by a core agenda encompassing four key clusters of questions concerning the meaning sources uses and limits of power These essays ask What new lessons are offered for power analysis in International Political Economy **An Economic and Social History of Europe, 1890-1939** Frank B. Tipton, Robert Aldrich, 1987 *Rising China in the Changing World Economy* Liming Wang, 2012-03-12 China s rapid and sustained growth over last thirty years has propelled it to become the world s second largest economy today and potentially the largest in the foreseeable future As one of the first major economies pulling out of recession and the last remaining major socialist country in the world today China presents a challenge to established thinking on the essential primacy of global capitalism and the settled nature of the world system as China becomes more integrated into the world economy and the international system both are themselves potentially transformed as a result of China s involvement This book explores a wide range of issues connected with the impact of China on the global economy and the prevailing international system Subjects covered include China s multinationals international acquisitions the exchange rate research and development and technology transfer China s emerging major business groupings and small and medium sized enterprises **Development Theory and the Three Worlds** Björn Hettne, 1995 An intellectual history of social science and development theories describing early primarily European theories on development and their transformation in response to Third World realities and looking at the relationships between development theory mainstream social sciences and international political economy This second edition discusses major events that have taken place since the 1990 edition such as the Gulf War the fall of the Berlin Wall and the Rio Conference Designed as a core text for upper level undergraduates A Longman imprint published in the US by Wiley Annotation copyright by Book News Inc
