Viral Challenge Review Open Now:

Methodological Challenges in Nature-Culture and Environmental History Research Jocelyn Thorpe, Stephanie Rutherford, L. Anders Sandberg, 2016-11-10 This book examines the challenges and possibilities of conducting cultural environmental history research today Disciplinary commitments certainly influence the questions scholars ask and the ways they seek out answers but some methodological challenges go beyond the boundaries of any one discipline The book examines how to account for the fact that humans are not the only actors in history yet dominate archival records how to attend to the non visual senses when traditional sources offer only a two dimensional non sensory version of the past how to decolonize research in and beyond the archives and how effectively to use sources and means of communication made available in the digital age This book will be a valuable resource for those interested in environmental history and politics sustainable development and historical geography

Digital Age: Chances, Challenges and Future Svetlana Igorevna Ashmarina, Marek Vochozka, Valentina Vyacheslavovna Mantulenko, 2019-07-27 This proceedings book presents the outcomes of the VII International Scientific Conference Digital Transformation of the Economy Challenges Trends New Opportunities which took place in Samara Russian Federation on April 26 27 2019 Organized by the Samara State University of Economics the conference chiefly focused on digital economy issues such as theoretical preconditions for the development of economic systems in the digital age and specific practical issues related to real world business practice Consisting of six chapters corresponding to the thematic areas of the conference and written by scientists and practitioners from different regions of Russia Kazakhstan the Czech Republic and Germany the book offers answers to the most pressing questions for today s business community How is our world changing under the influence of digital technology Is sustainable economic development a myth or reality in the context of digitalization What threats and opportunities does digitalization bring What are realities and prospects of digitalization in the context of business practice How do we create a digital infrastructure for the economy How should the legal environment of the economy be transformed in the context of digitalization The conclusions and recommendations presented are not recipes for solving the existing economic problems but instead are intended for use in further research on transformation processes in the economy and in the development of state economic policies in various countries and regions

Animal Health and Production: Identifying Challenges and Finding a Way Forward Izhar Hyder Qazi, Yangchun Cao , Jesus R. Requena, 2025-11-24 It has been said that the difficulty with predicting the future is that uncertainty seems to increase exponentially with the number years in the future simply because we can t predict technology let alone geopolitical upheavals By the year 2050 our world will grow to 10 billion people and we need to feed them with shrinking resources At the same time we must take into consideration that global warming will have a profound impact on the animal production systems in coming decades if no timely measures are adopted to address this pressing issue These issues desperately need to be addressed and certainly solutions to these pressing problems will be

intertwined as we strive to feed a growing population while building sustainable and efficient food systems. Clearly, health is at the heart of the sustainable animal production systems; therefore, optimizing the animal health and mitigating the stresses of pathogen and production related diseases is also essential. It is now well established that animals are more susceptible to diseases when they are kept under stressful environments. Therefore, improved animal management systems focusing on disease prevention are essential for optimized production of animals. In addition, it has been said that over 60% of pathogens that cause human diseases originate from domestic or wild animals; therefore, protecting the health of animals and the environment protects human health. Moreover, antimicrobial resistance (AMR) has been regarded one of the most pressing health issues of the present time and as well as is a growing threat to livelihoods and global food security. It is daunting to even imagine a world where there is almost no cure for diseases in humans, animals, and plants. This worst case scenario might turn out to be a reality as pathogenic microbes develop resistance to the antimicrobial arsenals that are used to combat them. The societal demand regarding public health, zoonoses, AMR, etc., welfare, and sustainability, i.e., feed efficiency, methane emission, is also increasing. The good news is that solutions do exist, and the quest for efficient production systems, intelligent breeding, improved nutrition, viable diagnostic methods, tailored made biosecurity procedures, and integrated health and welfare management is ongoing with the scientific community and industry. Fittingly, it has been said that all of the world's big problems are multidisciplinary in nature; therefore, the present-day animal scientists and veterinary researchers must break their expertise-based cocoons and work in a collaborative manner to sustainably meet the on-going and future increasing demand of animal source foods and to ensure good health of animals. Finally, as we search for quantum leaps in productivity, novel and innovative technological solutions need to be put in the practice to achieve these envisaged goals:

1. Studies focused on sustainable animal production, particularly those centred on the principle of clean, green, and ethical animal management systems.
2. Disease management, including transboundary diseases, zoonoses, of course, and control strategies.
3. Studies focusing on alternatives to antibiotic use in animal health and production systems and mitigation of AMR threat.
4. Mechanistic studies focused on the host-pathogen interactions.
5. Practice and the development of novel and classical therapeutics aimed at improving health and production.
6. Studies using innovative technological and bioinformatic tools to address the pressing issues relevant to animal health and production.
7. Studies focused on bringing the animal production systems on the path to climate neutrality.

OECD Investment Policy Reviews: China 2003 Progress and Reform

Challenges OECD, 2003-07-02. This study records and evaluates the development so far of an enabling environment for FDI in China and suggests policy options designed to improve it further. [Advances and Challenges in Nanomedicine](#) Susan Hua, Sherry Y. Wu, 2019-02-28. Nanotechnology is a multidisciplinary field that is revolutionizing the way we detect and treat damage to the human body. Nanomedicine applies nanotechnology to highly specific medical interventions for the prevention, diagnosis, and treatment of diseases. They are increasingly being used to overcome biological barriers in the body to improve

the way we deliver compounds to specific tissues and organs In particular nanomedicines have been shown to be beneficial for stabilizing therapeutic compounds overcoming obstacles to cellular and tissue uptake and improving biodistribution of compounds to target sites in vivo Nanomedicines have demonstrated significant therapeutic advantages for a multitude of biomedical applications however the clinical translation of these nanotechnology platforms has not progressed as quickly as the plethora of positive results would have suggested Understanding the advances in nanomedicine to date and the challenges that still need to be overcome will allow future research to improve on existing platforms and to address the current translational and regulatory limitations This eBook Advances and Challenges in Nanomedicine has brought together experts in the fields of nanomedicine nanotechnology nanotoxicology pharmaceuticals manufacturing and translation to discuss the application of nanotechnology to drug delivery This information is presented as original research opinion perspective and review articles The goal of this eBook is to generate collaborative discussion on the current status general trends challenges strategies and future direction of pharmaceutical nanotechnology as well as highlight current and emerging nanoparticulate platforms with potential medical applications
