Computer Age Robert Wachter, 2015-04-10 The New York Times Science Bestseller from Robert Wachter Modern Healthcare's 1 Most Influential Physician Executive in the US While modern medicine produces miracles it also delivers care that is too often unsafe unreliable unsatisfying and impossibly expensive For the past few decades technology has been touted as the cure for all of healthcare's ills But medicine stubbornly resisted computerization until now Over the past five years thanks largely to billions of dollars in federal incentives healthcare has finally gone digital Yet once clinicians started using computers to actually deliver care it dawned on them that something was deeply wrong Why were doctors no longer making eye contact with their patients How could one of America's leading hospitals give a teenager a 39 fold overdose of a common antibiotic despite a state of the art computerized prescribing system How could a recruiting ad for physicians tout the absence of an electronic medical record as a major selling point Logically enough we've pinned the problems on clunky software flawed implementations absurd regulations and bad karma It was all of those things but it was also something far more complicated And far more interesting Written with a rare combination of compelling stories and hard hitting analysis by one of the nation's most thoughtful physicians The Digital Doctor examines healthcare at the dawn of its computer age It tackles the hard questions from how technology is changing care at the bedside to whether government intervention has been useful or destructive And it does so with clarity insight humor and compassion Ultimately it is a hopeful story We need to recognize that computers in healthcare don't simply replace my doctor's scrawl with Helvetica 12 writes the author Dr Robert Wachter Instead they transform the work the people who do it and their relationships with each other and with

patients Sure we should have thought of this sooner But it s not too late to get it right This riveting book offers the prescription for getting it right making it essential reading for everyone patient and provider alike who cares about our healthcare system **The Ironmonger** ,1889 Harnessing the Fourth Industrial Revolution ,2019 **The illustrated official journal (patents)** ,1891 Engineering Record, Building Record and Sanitary Engineer Henry Coddington Meyer,Charles Frederick Wingate,1891 **Alloys Index** ,1989 **Minnesota Directory of Manufacturers** ,1975
