Real Life Case Studies For School Board Members:

The Fate of Liberal Arts in Today's Schools and Colleges William Hayes, 2015-12-11 It is the purpose of this book to examine the ever changing meaning of the term liberal arts and to trace its development from antiquity to the present In doing so the text will compare and contrast the values of such an education with the other important objective of schools and colleges which is to prepare students with appropriate occupational training The book will highlight the arguments of both points of view In doing so attention will be paid to the contributions to society of those who have been exposed to a variety of educational curricula As part of the study the impact of the community college will be considered along with the impact of recent initiatives such as the Nation at Risk Report No Child Left Behind Race to the Top and the Common Core Finally the text will conclude with an attempt to suggest the direction that will determine the fate of liberal arts in schools and colleges

The Heart and Mind in Teaching Alyssa Magee Lowery, William Hayes, 2014-07-30 The Heart and Mind in Teaching Pedagogical Styles Through the Ages provides an important historical context for an issue confronting every American teacher administrator student parent and citizen As the art of teaching is rapidly replaced by formulas clinical studies and one size fits all scientific pedagogy it is important to ask the question How did we get here Authors Alyssa Magee Lowery and William Hayes trace the history of teaching from Greek philosophy to twenty first century educational issues in an effort to provide some perspective in the long art versus science debate ultimately finding that the two components may be able to coexist peacefully

Consensus William Hayes, 2013-07-01 As we consider the current status of educational reform it is clear that the United States lacks a clear vision as to how to improve our schools In the recent past we have been able to gain support for ideas such as the need for special education programs free and reduced lunches pre school programs and equal educational opportunities for both boys and girls While programs such as these were possible because of a national consensus our challenge today is to agree on the way to move forward Although it is most obvious in our inability to act on No Child Left Behind the failure to define a common vision is true of many other issues in the field of education Without an agreed upon vision which includes the support of those working in our schools true reform will be extremely difficult The purpose of this book is to help the reader understand our differences and to suggest a way that we can reach a consensus on education reform
