Reflections on the Role of Ethics in Agriculture Robert Zimdahl, 2024-07-01 This volume is an update to *Weed Science A Plea for Thought Revisited* published by Springer in 2012 More than a decade after the first edition ethical discussion on the use of pesticides for weed management is largely absent Startlingly weed science and agriculture have continued on the same path and are still dominated by capital chemical and energy intensive practices including the paralysis of pesticides This second edition expands upon the first using recent data to confirm the dominance of herbicides The revision includes chapters which emphasize the role of ethics in agriculture and the reasons it should but has not yet become part of agricultural education This includes suggestions on how education in agricultural ethics should be shifting and whose responsibility it is The revised version also includes a discussion on the role of genetically modified crops and the consequences of using these crops both positive and negative Scientists have developed a wealth of knowledge they bring to the surface of their disciplinary silos Yet there needs to be greater discussion on the necessity and risks of agricultural science and technology This revised version provides a rigorous examination of weed science's goals and ethics and challenges the way we manage weeds and agriculture **Knowledge in the Information Society** Daria Bylieva, Alfred Nordmann, Olga Shipunova, Violetta Volkova, 2021-01-15 This book provides a snapshot of state of the art interdisciplinary discussions in Russia about technology in the information society New technologies are subject to original theoretical analysis but there are also reflections on the practical experience of their application The book covers a range of topics which includes human technology interaction education in digital reality distance education due to COVID 19 quarantine measures cognitive technologies system analytics of information and communication technologies The book collects contributions from philosophy didactics computer sciences sociology psychology media studies and law It contains a selection of papers accepted for presentation at the XX International Conference Professional Culture of the Specialist of the Future 26-27 November 2020 St Petersburg and the XII International Conference Communicative Strategies of the Information Society 23-24 October 2020 St Petersburg *History and Historiography in Greece* Nikos Christofis, 2025-05-01 An updated guide to Greek historiography was long overdue In this comprehensive and temporally wide ranging reassessment *History and Historiography in Greece* examines the evolution of Greek historical scholarship by reviewing the ideas methods and schools

of history shaping the field From how these developments correspond with international trends to their rate of development alongside global shifts in scholarship this volume identifies not only the ideological limitations shaping Greek academia but also the innovations that are breaking new ground In doing so the contributors illuminate how those developments yield new lessons for existing conceptual frameworks within the fields of labor gender diaspora studies and more *Christian in Public* L. D. Hansen, 2008-02-01 Higher education has not escaped the imperative of transformation which has marked the post apartheid South African landscape The nature of the changes at universities however is open to critique Fundamental questions concerning the ideological moorings of knowledge and the politics of the curriculum have not yet been satisfactorily addressed During the apartheid era theology faculties played influential roles at traditional universities and were often characterised by unsettling exclusion of non Christian religions non Calvinist denominations and marginalised voices This volume of essays evidences a process at the University of the Free State s Faculty of Theology to reflect seriously about the need for transformation at the fundamental level that is of knowledge The challenge for theology at a public university is framed in terms of epistemological transformation A number of outstanding public intellectuals such as Jonathan Jansen Crain Soudien and Lis Lange have been invited to present papers to clarify the conceptual challenge and what this might entail for theology Well known theologians such as Conrad Wethmar Allan Boesak and Martin Prozesky reflect on the nature of theology and religion at universities amidst social exigencies Two international theologians Harold Attridge from the prestigious Yale Divinity School and Bram van de Beek from the Free University of Amsterdam share their experiences of institutions that exemplify excellence and ecumenical openness Theologians from the Departments of Practical Theology and Systematic Theology at the University of the Free State writing from the inside articulate the challenges they envision for theology in a post apartheid dispensation The essays represent a variety of perspectives but all attest to a commitment to rethink the nature and task of theology at a public university accepting the challenge of knowledge and power of plurality and otherness and of restorative intellectual justice These timely essays make a unique contribution to the discourses on transformation and on theology at a public university *Review of Indonesian and Malaysian Affairs*, 1989 *Art Reviews and Commentaries by Robert L.
