

IMPLICATIONS IN EDUCATION

IDEALISM

- ❖ All material things are explainable
- ❖ Ultimate reality is spiritual. Nature possesses meaning and purpose.
- ❖ knowledge is independent of sense experience
- ❖ start with the idea and ends with thing
- ❖ universe as being made of mind or reason
- ❖ high regard for individuality and freedom in education

REALISM

- ✓ Propositions are true only if they correspond with known facts
- ✓ Physical matter is the ultimate reality. Nature and science are real.
- ✓ knowledge is derived through sense experience
- ✓ starts with a thing and end up with idea
- ✓ an attempt to portray life as it is
- ✓ Recognizes the importance of individual education

Reality Idealism

Johanna Blomqvist

Reality Idealism:

Idealism Tyron Goldschmidt, Kenneth L. Pearce, 2017-12-08 Idealism is a family of metaphysical views each of which gives priority to the mental. The best known forms of idealism in Western philosophy are Berkeleyan idealism which gives ontological priority to the mental minds and ideas over the physical bodies and Kantian idealism which gives a kind of explanatory priority to the mental the structure of the understanding over the physical the structure of the empirical world. Although idealism was once a dominant view in Western philosophy it has suffered almost total neglect over the last several decades. This book rectifies this situation by bringing together seventeen essays by leading philosophers on the topic of metaphysical idealism. The various essays explain, attack or defend a variety of idealistic theories including not only Berkeleyan and Kantian idealisms but also those developed in traditions less familiar to analytic philosophers including Buddhism and Hassidic Judaism. Although a number of the articles draw on historical sources all will be of interest to philosophers working in contemporary metaphysics. This volume aims to spark a revival of serious philosophical interest in metaphysical idealism.

Manifest Reality Lucy Allais, 2015-09-03 At the heart of Immanuel Kant's critical philosophy is an epistemological and metaphysical position he calls transcendental idealism. The aim of this book is to understand this position. Despite the centrality of transcendental idealism in Kant's thinking in over two hundred years since the publication of the first Critique there is still no agreement on how to interpret the position or even on whether and in what sense it is a metaphysical position. Lucy Allais argues that Kant's distinction between things in themselves and things as they appear to us has both epistemological and metaphysical components. He is committed to a genuine idealism about things as they appear to us but this is not a phenomenalist idealism. He is committed to the claim that there is an aspect of reality that grounds mind dependent spatio temporal objects and which we cannot cognize but he does not assert the existence of distinct non spatio temporal objects. A central part of Allais's reading involves paying detailed attention to Kant's notion of intuition and its role in cognition. She understands Kantian intuitions as representations that give us acquaintance with the objects of thought. Kant's idealism can be understood as limiting empirical reality to that with which we can have acquaintance. He thinks that this empirical reality is mind dependent in the sense that it is not experience transcendent rather than holding that it exists literally in our minds. Reading intuition in this way enables us to make sense of Kant's central argument for his idealism in the Transcendental Aesthetic and to see why he takes the complete idealist position to be established there. This shows that reading a central part of his argument in the Transcendental Deduction as epistemological is compatible with a metaphysical idealist reading of transcendental idealism.

Hyperreality Johanna Blomqvist, 2024-04-09 How should we approach life and its challenges? Are they real? What do we really know about reality? Could modern physics help us to understand? What kind of worldview does it really shape for us? What is the connection between reality and consciousness? Do we live in a simulation? In this book Johanna Blomqvist Ph.D. is diving into the question of reality a topic which has been of interest to her since

childhood The desire to understand the world reality and the purpose of everything has also led her to the frontiers of science and to topics physicists do not often approach Her first book From Quantum Physics to Energy Healing A Physicist s Journey to Mind and Healing was published on Amazon in 2018 Hyperreality is a book about the nature of our reality and the hypotheses we have made about it through the centuries Johanna Blomqvist describes many cases and research experiments that will puzzle your mind Our reality seems to be something other than what the current prevailing materialistic worldview suggests From Chapter 2 Are we only machines There are many phenomena that we encounter almost daily but which do not fit into the current materialistic worldview Such phenomena are often classified as anomalies or parapsychological when it is impossible to explain them with prevailing theories Such phenomena include premonitions intuition telepathy premonition dreams and synchronicity Science seeks to find objective truth but is such a goal even possible After all all objective information is based on subjective observation Robert Jahn and Brenda Dunne founders of the PEAR Princeton Engineering Anomalies Research laboratory which has studied the effect of the mind on matter for decades say Mind without matter leaves us with a world of ephemeral abstraction matter without mind eliminates the essence of life itself It seems that the transition to the so called post materialistic era is essential We don t have any alternatives if we want to continue our life as humanity on Earth into the future We have to change our thinking It is time to understand our effect on physical reality and move to a new era beyond materialism You exist dive into hyperreality in which you are a significant participant Hyperreality book has been written to everyone seeking for answers about the nature of our reality purpose of everything consciousness and the connection between science and spirituality It may help you to understand phenomena that you earlier have only omitted This book is the answer that Johanna Blomqvist herself wanted to find as a teen when she was contemplating the question of reality why we are here and how should one live About the Author Johanna Blomqvist Ph D is a physicist entrepreneur and internationally published author In her work she combines a wide variety of fields and methods in a unique way often discussing topics from the cutting edge and unconventional areas of science Blomqvist is also a sought after lecturer educator and energy healer Since childhood she has been interested in understanding our reality consciousness and our role in this universe Johanna s first book From Quantum Physics to Energy Healing A Physicist s Journey to Mind and Healing was published on May 2018 She has written also Hyperreality Beyond the Horizon where Physics Meets Consciousness 2021 and The Mystery of Water A Physicist s Dive into Our Deepest Essence Fall 2024 Johanna lives in Helsinki Finland

Praetorius, 2012-12-06 This book addresses a growing concern as to why Psychology now more than a hundred years after becoming an independent research area does not yet meet the basic requirements of a scientific discipline on a par with other sciences such as physics and biology These requirements include agreement on definition and delimitation of the range of features and properties of the phenomena or subject matter to be investigated secondly the development of concepts and methods which unambiguously specify the phenomena and systematic investigation of their features and properties A third equally important requirement implicit in the first two is exclusion from enquiry of all other matters with which the discipline is not concerned To these requirements must then be added the development of basic assumptions about the nature of what is under investigation and of principles to account for its properties and to serve as a guide as to what are relevant questions to ask and theories to develop about them *Schopenhauer's System in Its*
