Identity and Capitalism Marie Moran, 2014-11-13 This is a splendid book that dispels myths about identity and presents a cultural materialist case for the study of such keywords and their preoccupations under the hegemony of neoliberal capitalism Professor Jim McGuigan Loughborough University Identity particularly as it is elaborated in the associated categories of personal and social identity is a relatively novel concept in western thought politics and culture The explosion of interest in the notion of identity across popular political and academic domains of practice since the 1960s does not represent the simple popularisation of an older term as is widely assumed but rather the invention of an idea Identity and Capitalism explores the emergence and evolution of the idea of identity in the cultural political and social contexts of contemporary capitalist societies Against the common supposition that identity always mattered this book shows that what we now think of routinely as personal identity actually only emerged with the explosion of consumption in the late twentieth century It also makes the case that what we now think of as different social and political identities only came to be framed as such with the emergence of identity politics and new social movements in the political landscapes of capitalist societies in the 60s and 70s Marie Moran provides an important new exploration of the articulation of the idea of identity to the social logic of capitalism from the organised capitalism of the mid twentieth century up to and including the neoliberal capitalism that prevails today Drawing on the work of Raymond Williams the cultural materialist approach developed here provides an original means of addressing the political debates about the value of identity in contemporary capitalist societies

Students on the Margins Jaylynn N. Hutcheson, 1999-05-27 The focus of teaching is not on what we teach or how we test but more fundamentally on the quality of relationships according to Jaylynn Hutchinson in *Students on the Margins* Amid much talk of educational reform that focuses on pedagogy curriculum and policy Hutchinson attests that when we don't pay attention to students' personal stories students can become marginalized from the process of learning not only via race class and gender but also psycho-socially Using story as a metaphor for paying attention to the meaning children create in their lives she suggests how story can become an active part of the classroom and curriculum asking teachers to pay attention to relationships and to create the space to accommodate stories in the classroom

Ethics and the Market Betsy Jane Clary, Wilfred Dolfsma, Deborah M. Figart, 2006-09-27 Comprising cutting edge work on the state of social economics today this theoretically diverse book includes strong emphasis on the role of ethics morality identity and society in economic theorizing Much existing economic theory overlooks ethics Rather than situating the market and values at separate extremes

of a continuum Ethics and the Market contends that the two are necessarily and intimately related This volume brings together some of the best work in the social economics tradition with strong contributions and pedagogy and a cross national blend of economics philosophy and policy The contributors embed the economic within the social rather than viewing the economy and society as separable spheres of life activity and in so doing three key themes are illuminated corresponding to the volume s tripartite structure Morality and Markets Redefining the Boundaries of Economics Social Economics in Transition Ethics and the Market illuminates the diverse and dynamic theoretical approaches that are employed in social economics reflecting on their continuously evolving relationship with neoclassical economics Taking an innovative approach this integrative book challenges traditional ways of thinking and will prove vital reading for students and academics in the fields of Economics Sociology Gender Studies and Public Policy *Identification and Character* Howard Kamler,1994-10-28 This book tells the reader all about psychological identification the single most important process for becoming maintaining or changing who we are as characters The book s emphasis though is decidedly on identification s role in our becoming who we are It is one thing for people to have an image of who they are or of who they would like to be it is quite another for them to actually become that image Through genuinely identifying with these sorts of things we turn what otherwise would be mere mental pictures of traits into character traits that we psychologically own Readable to laypersons as well as to academicians this book offers a new perspective for understanding the formation and nature of human character Kamler also discusses some important issues in psychoanalysis and philosophy He clarifies the current psychoanalytic debate about identification s place among the primitive processes of self development offers new ways of looking at the relationship between the infant self and the adult character and addresses topics such as personal identity and identity crisis In addition the book speaks to a current philosophical debate about the fundamental nature of self offering the author s own thesis and showing how all the protagonists in the discussion share a basically flawed position about the role that having values plays in our being persons *Miscellaneous Documents* United States. Congress. House,1865 **Cases of Contested Elections in Congress, from 1834 to 1865, Inclusive** David W. Bartlett,2022-03-24 Reprint of the original first published in 1865 **Outlines of Logic and Metaphysics** Eduard Erdmann,1896 *Global Responsibilities* Andrew Kuper,2005 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company **National Missile Defense and the Politics of US Identity** Natalie Bormann,2008-12-15 Why adopt a poststructural lens for the reading of the military strategy of national missile defence NMD No doubt when contemplating an attack on US territory by intercontinental ballistic missiles consulting Michel Foucault and critical international relations theory scholars may not seem the obvious route to take The answer to this lies in another question why has there been so much interest and continuous investment in NMD deployment when there is such ambiguity surrounding the status of threat to which it responds controversy over its technological feasibility and concern about its cost Posed in this manner the question cannot be answered on its own terms the terms given

in official accounts of NMD that justify the system's significance on the basis of strategic feasibility studies and conventional threat predictions guided by worst case scenarios. Instead, this book argues that the preferences leading to NMD deployment must be understood as satisfying requirements beyond strategic approaches and issues. In turning towards the interpretative modes of inquiry provided by critical social theory and poststructuralism, this book contests the conventional wisdom about NMD and suggests reading the strategy in terms of US identity. Presented as an analysis of discourses on threats to national security around which the need for NMD deployment is predominantly framed, this book is an effort to let the two fields of critical international relations theory and US foreign policy speak directly to each other. It seeks to do so by showing how the concept of identity can be harnessed to an analysis of a contemporary military strategic practice. **Philosophical works.-**
