Transcatheter Valve Repair Ziyad M. Hijazi,Carlos E. Ruiz,Philipp Bonhoeffer,Ted Feldman,2006-01-17 Transcatheter Valve Repair discusses all aspects related to percutaneous and established valve repair methods The book is divided into few major sections covering all four valves and other topics Each section contains several chapters discussing everything related to that valve Beginning with the pulmonary valve since it was the first valve to be tackled in the catheterization laboratory and then moving to the aortic then the mitral and then finally end with the tricuspid valve 1 5M US citizens alone have some degree of aortic valve stenosis with half 750K requiring aortic valve replacement Aortic valve replacement on the whole is performed by surgeons requiring bypass machines and technicians as well as the usual operating team The operation is expensive and occupies a considerable amount of operating room time Mostly the aortic valve is calcified and the usual option available to patients is valve replacement with a variety of choices ranging from porcine valves to synthetic for which there are many manufacturers It should be noted that the aortic valve is the most problematic of valves Percutaneous procedures are the answer The bottom line is that given the growing elderly population many more patients will require valve repair thus increasing health care costs with not only surgical operations but also hospitalisation Percutaneous valve repair whilst requiring a cath lab team does not involve bypass machines nor extended hospitalisation Like percutaneous transluminal coronary artery interventions PTCA has replaced coronary artery bypass grafts once the golden standard and now stenting having replaced PTCA and its balloons We now see drug eluting stents replacing ordinary stents though at a much higher cost There will be a huge movement toward percutaneous valve repair which should presumably cut costs but also morbidity and mortality American Book Publishing Record ,1997-09 *Rothman-Simeone The Spine E-Book* Harry

Molecular Biology and Pharmacology of Tissue Repair Fundación Dr. Antonio Esteve. Symposium,2007 Diseases associated with impaired tissue repair are common clinical problems Therefore the elucidation of the molecular basis of normal and impaired repair will help to define new therapeutic targets to alleviate and eventually cure these illnesses Furthermore recent studies have revealed remarkable similarities between tissue repair and cancer at the cellular and molecular level Thus the characterization of the mechanisms underlying normal repair processes will also enhance our knowledge on the pathogenesis of cancer and provide the basis for the development of novel cancer therapeutics In recent years our understanding on the molecular and cellular mechanisms involved in tissue repair has strongly increased and some of the regulatory genes and signalling cascades have been identified Furthermore new strategies have been developed for the improvement of organ regeneration involving the use of growth factors or matrix proteins stem cells and new biomaterials

MOLECULAR BIOLOGY AND PHARMACOLOGY OF TISSUE REPAIR summarizes the work of major experts in the tissue repair field Similarities and differences in repair of different tissues and organs are reviewed and the parallels between tissue repair and embryonic development as well as between tissue repair and cancer are reported Therefore this volume will be of interest for basic scientists who work on embryonic development tissue repair and cancer as well as for clinicians of different disciplines

Overview on repair of different tissues and organs Parallels between development and tissue repair Parallels between tissue repair and cancer
