Gary R. Collins

Rebuilding Of Psychology:

The Rebuilding of Psychology Gary R. Collins, 1977 Dr Gary R Collins provides an overview and evaluation of the field of contemporary psychology and identifies the presuppositions that underlie this discipline As a Christian he looks beyond the dilemmas of modern psychology and sees hope for humanity and for the science of human behavior The Rebuilding of Psychology makes a bold proposal for rebuilding psychology on the theistic premise that God exists and is the source of all truth Back cover **Integrative Approaches to Psychology and Christianity, Fourth Edition** David N.

Entwistle, 2021-11-03 Since the first edition of Integrative Approaches to Psychology and Christianity was published in 2004 this has become the standard textbook on the topic Now in its fully revised fourth edition Dr Entwistle's book elucidates historical philosophical and practical issues in the integration of psychology and Christianity As in previous editions the current text provides an introduction to many of the worldview issues and philosophical foundations that frame the relationship of psychology and theology includes scholarly reflection on the integration literature and surveys six models of possible relationships between psychology and Christianity ranging from those that are completely opposed to either religion or psychology to intermediate models that assert that some limited interaction between them is possible to viewpoints which suggest that a Christian worldview approach can be used to provide a context for exploring areas of overlapping interest between psychology and Christianity The current edition considers recent advances in both Catholic and Protestant thinking on integration including contemporary questions about what evangelicalism is and is not that shape evangelical reactions to the integration debate New content ranges from information about the contrasting views of Tertullian and Augustine to insights from contemporary psychology about factors that adversely affect the quality and reliability of human thinking to how conflict over COVID 19 has entered contemporary religious debate The book is designed to help readers become aware of the presuppositional backdrops that each of us brings to these issues Questions at the end of each chapter are included to help readers evaluate both the material and their own burgeoning approach to integration This book is ideal as a textbook for students of psychology and other behavioral and social sciences social work sociology theology counseling pastoral counseling at both the graduate and undergraduate level It is also written for the broader readership of psychologists counselors pastors and others who are interested in integration **A History of Modern Psychology** Duane
