Recasting Egalitarianism New Rules For Communities States And Markets:

Recasting Egalitarianism Samuel Bowles, Herbert Gintis, Harry Brighouse, 1998 Addresses the challenges posed by a globally integrated economy and the economic roles played by information and motivation The text argues for an egalitarian redistribution of assets land capital and housing and the beneficial disciplining effects of competition **Social Justice and Individual Ethics in an Open Society** Frank Vandembroucke, 2012-12-06 Can the need for incentives justify inequality Starting from this question Frank Vandembroucke examines a conception of justice in which both equality and responsibility are involved In the first part of the inquiry which explores the implementation of that conception of justice the justification of incentives assumes that agents make personal choices based only upon their own interests The second part of the book challenges the idea that a normative conception of distributive justice can be based on that traditional assumption i e that personal choices are not the subject matter of justice Thus Vandembroucke questions the Rawlsian idea that the primary subject of a theory of justice is the basic structure of society and not the individual conduct of its citizens For a society to be really just the ethos of individual conduct has to serve justice Non mathematical readers can skip the formal model proposed in Chapter 3 and understand the rest of the book **Urban Competitiveness** Iain Begg, 2002-02-27 The factors that make some cities more successful has become an increasingly important policy issue This book is the first to explore facets of competitiveness in a systematic way that combines theory evidence and policy implications Bringing together experts on urban economic performance it provides a new look at urban competitiveness **The Oxford Handbook of Mutual, Co-Operative, and Co-Owned Business** Jonathan Michie, Joseph R. Blasi, Carlo Borzaga, 2017-03-23 The Oxford Handbook of Mutuals and Co Owned Business investigates all types of member owned organizations whether consumer co operatives agricultural and producer co operatives worker co operatives mutual building societies friendly societies credit unions solidarity organizations mutual insurance companies or employee owned companies Such organizations can be owned by their consumers the producers or the employees whether through single stakeholder or multi stakeholder ownership This complex set of organizations is named differently across countries from mutual in the UK to solidarity cooperatives in Latin America In some countries such organizations are not even officially recognized and thus lack a specific denomination For the sake of clarity this Handbook will refer to member owned organizations to encompass the variety of non investor owned organizations and in the national case study chapters the terms used will be those most widely employed in that country These alternative corporate forms have emerged in a variety of economic sectors in almost all advanced economies since the time of the industrial revolution and the development of capitalism through the subsequent creation and dominance of the limited liability company Until recently these organizations were generally regarded as a rather marginal component of the economy However over the past few years member owned organizations have come to be seen in some countries at least as potentially attractive in light of their ability to tackle various economic and social concerns and their relative resilience

during the financial and economic crises of 2007 2013

Institutionelle Reformen für dezentrale Entwicklung Katja

Motivation, Agency, and Public Policy Julian Le Grand, 2003-09-18

Can we rely on the altruism of professionals or the public service ethos to deliver good quality health and education services And how should patients parents and pupils behave as grateful recipients or active consumers This book provides new answers to these questions a milestone in the analysis and development of public policy from one of the leading thinkers in the field It provides a new perspective on policy design emphasising the importance of analysing the motivation of professionals and others who work within the public sector and both their and public service beneficiaries capacity for agency or independent action It argues that the conventional assumption that public sector professionals are public spirited altruists or knights is misplaced but so is the alternative that they are all in David Hume s terminology knaves or self interested egoists We also must not assume that individual citizens are passive recipients of public services pawns but nor can they be untrammelled sovereigns with unrestricted choices over services and resources queens Instead policies must be designed so as to give the proper balance of motivation and agency The book illustrates how this can be done by detailed empirical examination of recent policies in health services education social security and taxation It puts forwards proposals for policy reform several of which either originated with the author or with which he has been closely associated universal capital or demogrant discriminating vouchers matching grants for pensions and for long term care and hypothecated taxes

Inequality and Power Eric A.

Schutz, 2011-03-21 This book is about the causes and consequences of economic inequality in the advanced market economies of today It is common that in market systems people choose their own individual economic destinies but of course the choices people make are importantly determined by the alternatives available to them unequal opportunity is the critical determinant of economic disparities This begs the question from where do the vast inequalities of opportunity arise This book theorizes that power and social class are the real crux of economic inequality Most of mainstream economics studiously eschews questions involving social power preferring to focus instead on individual choice subject to constraint in contexts of well functioning markets Yet both extra market power structures and power structures arising from within the market system itself are unavoidably characteristic of real world market based economies The normal working of labor and financial markets engenders an inherent wealth favoring bias in the distribution of opportunities for occupational choice But that bias is greatly compounded by the economic social political and cultural power structures that constitute the class system For those power structures work to distribute economic benefit to class elites and are in turn undergirded by the disparities of wealth they thus help engender Inequality and Power offers an economic analysis of the power structures constituting that class system employers power over employees the power of certain businesses over others professionals power over their clients and other employees cultural power in the media and education systems and political power in democratic government Schutz argues that a class analysis of the trend of increasing economic inequality today is superior to the

mainstream economic analysis of that trend After considering what is wrong with power based inequality in term of criteria of distributive justice and economic functionality the book concludes with an outline of various possible correctives This book should be of interest to students and researchers in economics sociology political science and philosophy as well as anyone interested in the theories of social class Politische Ansätze und Trends der gegenwärtigen Reform des Wohlfahrtsstaates

Christian Toft,2003 **Place Matters** Peter Dreier,John H. Mollenkopf,Todd Swanstrom,2004 Analyzes the problematic trends facing America s cities and older suburbs and challenges us to put America s urban crisis back on the national agenda

Philosophy & Public Policy Quarterly ,2004 *Democracy in Crisis?* A. H. Halsey,Roy Hattersley,2007 Posits the theory that democracy ethical as well as Marxist is in crisis threatened by the remorseless re penetration of the public sector by market and quasi market principles Can the tide be turned This book aims to provide food for thought for those interested in the fundamental problems facing the world in the twenty first century **The Socialist Register** Ralph Miliband,2000

Journal of Economic Literature ,2006-12 Re-examining the Distribution of Wealth in Rural China Mark D. Brenner,2000 **The Rise of the Market** Philip Arestis,Malcolm C. Sawyer,2004 The growth of neo liberalism has been the dominant political force in the past two decades This volume concentrates on understanding the political economy of neo liberalism It focuses on a number of the most critical issues and examines the essence of neo liberalism namely the dominance of the market In particular the authors consider the political economy of market expansion the rise of neo liberalism in advanced capitalist economies the notion of social capital the nature of economic imperialism the political economy of central bank independence the relationship between Keynes and Marx With contributions by some of the leading scholars in the field this vital new book on the political economy of neo liberalism and the dominance of the market will become essential reading for all those with an interest in post Keynesian economics political economy and international economic policy *The Economic State and the Welfare State* Paul Smyth,2000 **Humanity & Society** ,2004
