Recent Advances in Thin-Layer Chromatography F.A.A. Dallas,H. Read,R.J. Ruane,I.D. Wilson,2013-11-09 For many years TLC has suffered from the image of being a low sensitivity low resolution non quantitative technique suitable for chemists but not a tool for real chromatographers Whilst perhaps true in the past this attitude no longer reflects the capabilities of modern instrumentalized TLC in all its many forms This volume represents the proceedings of a meeting in Brighton in 1987 which formed part of a continuing series of one and two day events on TLC organized by the Chromatographic Society either alone or like this one in conjunction with other learned bodies These meetings are designed to keep chromatographers up to date with the latest developments and help promote a more positive image of TLC Ian Wilson November 1987 v CONTENTS The Chromatographic Society xi Contemporary Thin layer Chromatography An introduction I.D. **Validation of Thin-layer Chromatographic Methods for Pesticide Residue Analysis** International Atomic Energy Agency, 2005 Thin layer chromatography TLC was widely used in the 1960s and 1970s for pesticide residue analysis but only to a limited extent since gas liquid chromatography GLC and high performance liquid chromatography HPLC have become readily available In recent years there have been various developments in the quality of plate coating and in detection systems as well as in extraction and cleanup methods that make it possible to apply TLC according to the current international quality standards The TLC methods described in this publication are intended for laboratories where irregular supply of electricity lack of service or limited budget do not allow continuous use of GLC and HPLC techniques and where application of mass spectrometric detection is not feasible TLC analytical techniques allow for screening semi quantitative determination and confirmation of pesticide residues and other organic trace contaminants and have only minor requirements on equipment and laboratory infrastructure TLC methods are therefore particularly suitable for laboratories working on limited budgetary resources      Chemical Abstracts Service Source Index American Chemical Society.
