Interpretation Monika Zin, 2003 Die Höhlenkloster von Ajanta aus dem 1. Jh v. Chr. und dem 5. Jh n. Chr. bilden heute das am besten erhaltene Kunstensemble aus dem Alten Indien. Ajanta ist daher eine der wenigen Kunststätten, bei der wir nicht auf Zufallsfunde angewiesen sind, sondern die Möglichkeit erhalten, in die Vorstellungswelt der ganzen Epoche einzudringen. Die Arbeit versteht sich als komplementär zu dem Werk Dieter Schlingensiefels, behandelt aber ein ganz anderes, zum Teil erstmalig erschlossenes Bildmaterial, nämlich die nichtnarrativen Malereien. Die Aufgabe des Buches ist die Deutung der in Ajanta dargestellten Themen und ihre Erklärung mittels literarischer Quellen und Vergleiche mit den Darstellungen anderer Kunstregionen. Das erschlossene Bildmaterial ist in 48 Gruppen nach Inhalten in aufsteigender Reihenfolge vom Profanen zum Heiligen geordnet, d. h. von den rein ornamentalen Motiven über die umfangreichen Darstellungen der Genien bis hin zu der Visualisierung der buddhistischen Dogmatik.

A Brief History of Buddhist Studies in Europe and America Jan Willem Jong, 1997 This book contains indispensable information concerning the history of Buddhist studies in Europe and the United States and presents the readers with a survey that ranges from 300 B.C. up to modern times. This is an essential reference work for students of Buddhism who not only will benefit from the overview it gives of previous scholarly work but also may find in it indicators of the paths their own future research might take. Includes an extensive and detailed bibliography and two indices.

Paranormal States D. E. Osto, 2024-09-10 A number of converts to Buddhism report paranormal experiences. Their accounts describe psychic abilities like clairvoyance and precognition, out-of-body experiences, near-death experiences, and encounters with other beings such as ghosts and deities, and they often interpret these events through a specifically Buddhist lens. This book is a groundbreaking exploration of these phenomena and their implications for both humanistic and scientific study of the paranormal. D. E. Osto examines accounts of paranormal phenomena experienced by convert Buddhists from around the world, collected through an online survey and interviews, placing them in the context of Indian Buddhist sources and recent scientific research. They focus in detail on the life stories of two interviewees and the important role the paranormal has played in their lives. These contemporary first-person narratives demonstrate the continued importance of the psychic and paranormal within the Buddhist tradition and they can be interpreted as a living Buddhist folklore. Osto considers the limitations of both traditional religious views and Western scientific studies of the paranormal and proposes instead a new Buddhist phenomenological approach. Ultimately, *Paranormal States* contends that these deeply mysterious and extraordinary experiences exceed current understandings and they can help bridge the gap between religious and scientific worldviews.

web the efficiency of a steam turbine is an important metric as it quantifies how effectively the turbine converts the energy contained in steam into mechanical work the formula used to calculate the turbine efficiency is $\eta_{\text{turbine}} = \frac{W_{\text{turbine}}}{Q_{\text{in}}} \times 100$ where η_{turbine} represents the turbine efficiency expressed as a percentage W_{turbine} denotes the
