Recent Urban And Regional Developments In Poland And The Netherlands:

Foreign Direct Investment and Regional Development in East Central Europe and the Former Soviet Union

David Turnock, 2017-11-28 With the achievement of further EU and NATO enlargement a critical political and economic lens is now focused on East Central Europe and to a lesser extent the other former communist states Economic growth in each transition state and more broadly the region pivots around the prospects for foreign direct investment FDI with decisions on where foreign investors will locate their projects now vitally important This book the first one devoted to a geographical survey concentrating specifically on FDI in the region brings together a wide range of prominent authors from the US and Europe including the late Frank Carter to provide a timely and critical examination of the importance of foreign investment It presents a detailed analysis of location patterns and their significance for regional development with particular emphasis given to the important socioeconomic and political consequences of uneven distribution of FDI across the region and its constituent countries Divided into two parts the book first deals with general overarching themes and issues before applying these to more specific country case studies The second part deals with regional studies focusing broadly on the Western Balkans and Bulgaria before looking at specific economic sectors in individual countries *Entrepreneurship in a Regional Context* Michael Fritsch, David Storey, 2017-08-17 Enterprise and entrepreneurship is of strong interest to policy makers because new and small firms can be a key contributor to job and wealth creation However this contribution varies spatially with some areas in a country having new firm formation rates that are up to three or four times higher than others The vast majority of these new firms begin in the geographical area in which the founder lives works or was born emphasising that entrepreneurship is a local event The book documents a diversity of research approaches to examining the regional determinants of entrepreneurship in countries as contrasting as India and Sweden The Editors call is for scholars to better understand the long run factors that influence enterprise at the local and regional level For policy makers the Editors challenge is for them to be much clearer about the targets for their policies Is it new firms new jobs productivity and does it matter where these targets are delivered This book was published as a special issue of *Regional Studies* *OECD Urban Policy Reviews, Poland 2011* OECD, 2011-05-02 This comprehensive review of urban policy in Poland looks at the urban system and the challenges it faces national policies for urban development in Poland and adapting governance for a national urban policy agenda

Dillinger,2007-01-01 Regional economic development is an interest of policymakers throughout the Europe and Central Asia ECA region One of its principal aims is to reduce poverty in lagging regions by stimulating local economic growth However problems exist with this approach First it may miss the target Although geographical concentrations of poverty exist poor people also live in regions that are on average rich Second the sources of the problem may be misdiagnosed Poverty is not only related to where people are but to who people are In ECA poverty is associated with low levels of education and people who are too young or too old to participate in the labor force Under these circumstances efforts to bring higher wage employment opportunities to poor regions may have little immediate benefit for the people who live there Third relying on regional economic development to address poverty in lagging regions ignores the potential role of migration The emigration of labor rather than the immigration of capital may be a more effective means of reducing the poverty of individuals in lagging regions though this is unlikely to eliminate pockets of poverty quickly Development opportunities may exist in poor regions that markets have overlooked Interventions must be assessed carefully Some of the traditional instruments used to stimulate regional economic growth have mixed track records Comprehensive custom tailored approaches appear to be a promising alternative However governments should be modest in using regional development as a tool of poverty reduction Policies aimed at stimulating growth in poor regions should be complemented by more direct anti poverty measures including targeted transfers and investments in education and efforts to remove barriers to emigration World Bank website **OECD Regional Outlook 2016 Productive Regions for Inclusive Societies** OECD,2016-10-11 The OECD Regional Outlook 2016 examines the widening productivity gap across regions within countries and the implications of these trends for the well being of people living in different places *The Development and Hydraulic Roughness of Subaqueous Dunes* Antoine Wilbers,2004 Het is mogelijk de grootte en stromingsweerstand van duinen in de Rijn in Nederland te voorspellen Hierdoor kunnen de waterstanden tijdens extreme hoogwaters beter worden voorspeld *OECD Regional Development Studies Productivity and Jobs in a Globalised World (How) Can All Regions Benefit?* OECD,2018-04-26 This report looks at how regional policies can support productivity growth and jobs While there has been a remarkable decline in inequality in OECD countries inequality among regions within certain countries has increased over the same time period Regions that narrowed productivity gaps **Recent Urban and Regional Developments in Poland and the Netherlands** Egbert Wever,2003 **Words Matter in Policy and Planning** Margo van den Brink,Tamara Metze,2006 Contents 1 **Morphodynamics of a Cyclic Prograding Delta** D.
