Chemical Senses Joseph G. Brand, John H. Teether, Robert H. Cagan, Morley R. Kare, 2021-05-30 This book focuses on the initial biochemical and biophysical aspects of taste and olfaction It is intended for a wide audience both those already familiar with the chemical senses and those biochemists and neuro biologists interested in gaining an appreciation of this rapidly expanding discipline

**Fish Chemoreception** T.J. Hara, 2012-12-06 This book describes in general how the chemosensory systems of fish function at various levels In many ways fish are typical vertebrates differing only slightly from other vertebrates including humans In other ways their aquatic environment imposes strict requirements or offers unique opportunities which have resulted in some unusual functions having no counterpart in higher vertebrates This new volume is necessitated by advances in many vital areas as the field of chemical senses continues to grow at a rapid pace Most significant is the application of the contemporary electrophysiological technique of patch clamping recognition of a second messenger system in chemosensory transduction processes and the identification of hormonal pheromones in fish reproductive behaviour The last major synthesis of our knowledge about fish chemoreception Chemoreception in Fishes was published ten years ago Elsevier Amsterdam 1982 In that volume four aspects of fish chemoreception Le morphology of the peripheral chemoreceptors primary sensory processes roles in behaviour and its interactions with environment were discussed This book is intended to be helpful to students scientists and aquacul turists not only as a source book but also as a textbook on chemical senses

*Chemical Senses, Vol. I* Joseph G. Brand, 1989 **Perfumes** P.M. Muller, D. Lamparsky, 2012-12-06 The idea of publishing this book on Perfumes Art Science and Technology grew out of the observation that on the verge of the 1990s there was really no state of the art compilation of the relevant know how on which the fragrance industry is based It was obvious that such a compilation would be well received not only by perfumers and fragrance chemists but also by those involved in related trade and marketing or in the development and distribution of consumer products by researchers from other fields by students and finally by amateurs of perfumes in general Therefore we set out to find competent authors who were willing to contribute to the endeavour and we did not do this unselfishly on the contrary we selected a wish list of specialists who would provide us with new insight and characterize the trends and research priorities determining the future Thus we were counting on learning much ourselves in the course of the project We were more than pleasantly surprised by the reactions to our first letter and so was Elsevier We certainly had not expected perfumers who are usually much more doers than writers to react in such an enthusiastic way especially the spontaneous affirmative answer from the famous E Roudnitska created a momentum which contributed significantly to the successful comple tion of this book But of course we

should not create the impression that the other authors chapters are less important and we thank all of them heartily for their invaluable effort
