Placing Words Symbols Space And The City:

Placing Words William J. Mitchell, 2005-08-26 Reflections on architecture and the exchange of information in the spaces and places of the city from the necessity of skyscrapers in an age of Web sites to cities as talent magnets from architectural bling to the neo minimalism of the new MoMA The meaning of a message says William Mitchell depends on the context of its reception Shouting fire in a crowded theater produces a dramatically different effect from barking the same word to a squad of soldiers with guns he observes In *Placing Words* Mitchell looks at the ways in which urban spaces and places provide settings for communication and at how they conduct complex flows of information through the twenty first century city Cities participate in the production of meaning by providing places populated with objects for words to refer to Inscriptions on these objects labels billboards newspapers graffiti provide another layer of meaning And today the flow of digital information from one device to another in the urban scene creates a digital network that also exists in physical space *Placing Words* examines this emerging system of spaces flows and practices in a series of short essays snapshots of the city in the twenty first century Mitchell questions the necessity of flashy downtown office towers in an age of corporate Web sites He casts the shocked and awed Baghdad as a contemporary Guernica He describes architectural makeovers throughout history listing Le Corbusier's Fab Five Points of difference between new and old architecture and he discusses the architecture of Manolo Blahniks He pens an open letter to the Secretary of Defense recommending architectural features to include in torture chambers He compares Baudelaire the Parisian flaneur to Spiderman the Manhattan traceur He describes the iPod like galleries of the renovated MoMA and he recognizes the camera phone as the latest step in a process of image mobilization that began when artists stopped painting on walls and began making pictures on small pieces of wood canvas or paper The endless flow of information he makes clear is not only more pervasive and efficient than ever it is also generating new cultural complexities

Situations, Practices and Encounters Frank Eckardt, 2008-01-01 **MEDIACITY** Situations Practices and Encounters investigates how the social settings and spaces of the city are created experienced and practiced through the use and presence of new media It takes the position that new media enables different settings practices and behaviours to occur in urban space Contributions from academics practitioners and activists from disciplines such as Media Studies Architecture Urban Studies Cultural and Urban Geography and Sociology present a critical reflection on the processes methods and impacts of technologies in urban space

Teletechnologies, Place, and Community Rowan Wilken, 2014-02-07 Teletechnologies or technologies of distance cannot be ignored Indeed the present electronic age is said to have wrought profound changes to how we think about and experience who we are where we are and how we relate with one another Place and community have traditionally formed key concepts for thinking about these issues but what relevance do these concepts now hold for us In this wide ranging study Wilken re evaluates how ideas of place and community intersect with and help us make sense of a world transformed by information and communication technologies This interdisciplinary

investigation ranges across diverse textual and contextual terrain exploring approaches from media and communications architectural history and theory philosophy sociology geography literature and urban design The rich analysis of these myriad texts reveals the complex and at times contradictory ways in which notions of place and community circulate in relation to these technologies of distance Wilken's examination underscores both the enduring importance of ideas of place and community in the present age and the urgent need to continue to engage with think about and reconfigure these twin ideas

On South Bank: The Production of Public Space Alasdair J.H. Jones, 2016-05-23 Tensions over the production of urban public space came to the fore in summer 2013 with mass protests in Turkey sparked by a plan to redevelop Taksim Gezi Park Istanbul In London concomitant proposals to refurbish an area of the South Bank historically used by skateboarders were similarly met by staunch opposition Through an in depth ethnographic examination of London's South Bank this book explores multiple dimensions of the production of urban public space Drawing on user accounts of the significance of public space as well as observations of how the South Bank is practised on a daily basis it argues that public space is valued not only for its essential material characteristics but also for the productive potential that these characteristics if properly managed afford on a daily basis At a time when policy makers urban planners and law enforcement authorities simultaneously grapple with pressures to deal with social problems such as street drinking vandalism and skateboarding and accusations that new modes of urban planning and civic management infringe upon civil liberties and dilute the publicity of public space this book offers an insightful account of the daily exigencies of public spaces In so doing it questions the utility of the public private binary for our understanding both of common urban space and of different sets of social practices and points towards the need to be attentive to productive processes in how we understand and experience urban open space as public

Geomedia Scott McQuire, 2017-05-23 Geomedia offers critical analysis of the new possibilities and power relations emerging in the public space of contemporary cities As ubiquitous digital networks enable embedded and mobile devices to integrate place specific data with real time feedback circuits everyday experience of public space has become subject to new demands Looking beyond debates framed by the dominance of surveillance and spectacle McQuire asks how might the kind of collaborative practices that have flourished in art and online cultures be translated into urban space In the urban crisis of the 1960s Henri Lefebvre argued that the capacity for a city's inhabitants to actively appropriate the time and space of their surroundings was a critical dimension of modern democracy What does it mean to speak of the right to the city in the context of the networked city Addressing this question through a series of case studies this cutting edge text highlights the tensions between citizen and consumer communication and surveillance participation and control which define contemporary struggles over public space

Global Cities, Governance and Diplomacy Michele Acuto, 2013-02-11 This book illustrates the importance of global cities for world politics and highlights the diplomatic connections between cities and global governance While there is a growing body of literature concerned with explaining the

transformations of the international order little theorisation has taken into account the key metropolises of our time as elements of these revolutions The volume seeks to fill this gap by demonstrating how global cities have a pervasive agency in contemporary global governance The book argues that looking at global cities can bring about three fundamental advantages on traditional IR paradigms First it facilitates an eclectic turn towards more nuanced analyses of world politics Second it widens the horizon of the discipline through a multiscalar image of global governance Third it underscores how global cities have a strategic diplomatic positioning when it comes to core contemporary challenges such as climate change This book will be of much interest to students of urban studies global governance diplomacy and international relations in general
