## **Personal Performance Contracts:**

**The Principles of European Contract Law and Dutch Law: A Commentary** Ewoud H. Hondius, H. J. Van Kooten, 2002-08-27 The topic of harmonisation of European private law and European contract law in particular is rapidly gaining in importance. The topic is not only widely studied by academics and students all over Europe and even beyond it is also on the political agenda of the European Parliament, the European Commission and the European Council. The most important achievement in this field is no doubt the Principles of European Contract Law (PECL) drafted by the Commission on European Contract Law. The European Commission considers the PECL to be a serious option for further harmonisation of European contract law within the European Union. This publication is the first to provide a systematic overview of the PECL in comparison with Dutch contract law as a whole. The book is concise and because of its structure it is easily accessible. Amongst the contributors there are many highly distinguished contract law specialists. It may be used at universities in courses on Comparative Law, European Private Law and European Contract Law. It may also be used by international practitioners, foreign students and academics interested in Dutch contract law who do not have access to Dutch contract law because they have no knowledge of the Dutch language. Last but not least, the book will be of interest to all jurists interested in the harmonisation of the European Private Law.

This Handbook includes

Commentaries on European Contract Laws Nils Jansen, Reinhard Zimmermann, 2018-07-12 The book provides rule by rule commentaries on European contract law: general contract law, consumer contract law, the law of sale and related services, dealing with its modern manifestations as well as its historical and comparative foundations. After the collapse of the European Commission's plans to codify European contract law, it is timely to reflect on what has been achieved over the past three to four decades and for an assessment of the current situation. In particular, the production of a bewildering number of reference texts has contributed to a complex picture of European contract laws rather than a European contract law. The present book adopts a broad perspective and an integrative approach. All relevant reference texts from the CISG to the Draft Common European Sales Law are critically examined and compared with each other. As far as the *acquis commun* (i.e. the traditional private law as laid down in the national codifications) is concerned, the Principles of European Contract Law have been chosen as a point of departure. The rules contained in that document have however been complemented with some chapters, sections and individual provisions drawn from other sources, primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law. In

addition the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background and it thus investigates whether and to what extent these texts can be taken to be genuinely European in nature ie to constitute a manifestation of a common core of European contract law Where this is not the case the question is asked whether and for what reasons they should be seen as points of departure for the further development of European contract law *Military Law Review* ,1989 **An Elementary Digest of the Law of Contracts** Stephen Martin Leake,1878
