## **Personal Reflections Of An Historian:**

**To America** Stephen E. Ambrose, 2002-11-11 Completed shortly before Ambrose's untimely death *To America* is a very personal look at our nation's history through the eyes of one of the twentieth century's most influential historians. Ambrose roams the country's history praising the men and women who made it exceptional. He considers Jefferson and Washington who were progressive thinkers while living a contradiction as slaveholders and celebrates Lincoln and Roosevelt. He recounts Andrew Jackson's stunning defeat of a superior British force in the battle of New Orleans with a ragtag army in the War of 1812. He brings to life Lewis and Clark's grueling journey across the wilderness and the building of the railroad that joined the nation coast to coast. Taking swings at political correctness as well as his own early biases, Ambrose grapples with the country's historic sins of racism, its ill treatment of Native Americans and its tragic errors such as the war in Vietnam which he ardently opposed. He contrasts the modern presidencies of Eisenhower, Kennedy, Nixon and Johnson. He considers women's and civil rights, immigration, philanthropy and nation building. Most powerfully in this final volume, Ambrose offers an accolade to the historian's mighty calling.

*The Oxford Handbook of the History of Psychology: Global Perspectives* David B. Baker, 2012-01-13 The science and practice of psychology has evolved around the world on different trajectories and timelines yet with a convergence on the recognition of the need for a human science that can confront the challenges facing the world today. Few would argue that the standard narrative of the history of psychology has emphasized European and American traditions over others but in today's global culture there is a greater need in psychology for international understanding. This volume describes the historical development of psychology in countries throughout the world. Contributors provide narratives that examine the political and socioeconomic forces that have shaped their nations' psychologies. Each unique story adds another element to our understanding of the history of psychology. The chapters in this volume remind us that there are unique contexts and circumstances that influence the ways in which the science and practice of psychology are assimilated into our daily lives. Making these contexts and circumstances explicit through historical research and writing provides some promise of greater international insight as well as a better understanding of the human condition.

*Encyclopedia of Historians and Historical Writing* Kelly Boyd, 2019-10-09 The *Encyclopedia of Historians and Historical Writing* contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama. Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day, including individuals from related disciplines like Jürgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate. Additionally, the *Encyclopedia* includes some 200 essays treating the development of national, regional and topical historiographies from the Ancient Near East to the history of sexuality. In addition to the Western tradition, it includes substantial assessments of African, Asian and Latin American historians and debates on gender and subaltern studies.
