Miller, 1998 This book shows how to evaluate systems identify the problems and fix them without starting over from scratch The book is ideal for helping technology managers and software engineers solve problems without spending a lot of money

Model-Driven Software Migration: A Methodology Christian Wagner, 2014-03-10 Today reliable software systems are the basis of any business or company The continuous further development of those systems is the central component in software evolution It requires a huge amount of time man power as well as financial resources The challenges are size seniority and heterogeneity of those software systems Christian Wagner addresses software evolution the inherent problems and uncertainties in the process He presents a model driven method which leads to a synchronization between source code and design As a result the model layer will be the central part in further evolution and source code becomes a by product For the first time a model driven procedure for maintenance and migration of software systems is described The procedure is

composed of a model driven reengineering and a model driven migration phase The application and effectiveness of the procedure are confirmed with a reference implementation applied to four exemplary systems *Multikonferenz Wirtschaftsinformatik 2006* Franz Lehner, Holger Nösekabel, Peter Kleinschmidt, 2006 Dual-Use Space Technology Transfer Conference and Exhibition , 1994 **Advanced Information Systems Engineering** Benkt Wangler, Lars Bergman, 2003-06-29 CAiSE 2000 was the 12th in the series of International Conferences on Advanced Information Systems Engineering In the year 2000 the conference returned to Stockholm where it was organized the very first time Since that year 1989 the CAiSE conferences have developed into an important forum for the presentation and exchange of research results and practical experiences within the field of Information Systems Engineering The objective of the CAiSE conference series is to bring together researchers and practitioners in the field of information systems engineering to meet annually in order to discuss evolving research issues and applications in this field The CAiSE conference series also aims to provide an opportunity for young scientists to establish relationships with senior scientists in their areas of interest Stockholm is an important center of research and development for some of the leading IT and communications companies in Europe and indeed in the world In tune with this environment a major theme of CAiSE 2000 was information systems and services in a digitized world This theme reflects the vast improvements in communication technology including the increasing use of Internet and WWW that has taken place over the last years and that has led to better communication and easier information access in general In addition this development has initiated changes in the way organizations cooperate and trade

Model-Driven Reengineering Legacy Software Systems to Web Services ,2005 The advancement of internet technology enables legacy software systems to be reused across geographical boundaries Web Services WS have emerged as a new component based software development paradigm in a network centric environment based on the Service Oriented Architecture SOA the open standard description language XML and transportation protocol HTML Therefore legacy software systems can incorporate WS technology in order to be reused and integrated in a distributed environment across heterogeneous platforms In this paper we present a comprehensive systematic automatable approach toward reengineering legacy software systems to WS applications rather than rewriting the whole legacy software system from scratch in an ad hoc manner *Proceedings* ,2005 *Principles, Methodologies, and Service-Oriented Approaches for Cloud Computing* Yang, Xiaoyu, 2013-01-31 Innovations in cloud and service oriented architectures continue to attract attention by offering interesting opportunities for research in scientific communities Although advancements such as computational power storage networking and infrastructure have aided in making major progress in the implementation and realization of cloud based systems there are still significant concerns that need to be taken into account Principles Methodologies and Service Oriented Approaches for Cloud Computing aims to present insight into Cloud principles examine associated methods and technologies and investigate the use of service oriented computing technologies In addressing supporting infrastructure of the Cloud
