Nursing Education Jennifer

Boore, Patrick Deeny, 2012-09-18 Nursing Education provides a strategic guide and practical focus to curriculum planning and development. It will help all those involved in the provision of nursing education to understand the issues involved at the different stages of preparing a nursing curriculum which meets both professional and academic requirements. It integrates theory and practice, enables students to achieve the skills and competencies they need for professional practice, includes different methods of teaching and learning, provides clear guidance for student selection and assessment. Balancing theoretical principles with practical application and linked closely to the NMC's 2010 standards for pre-registration nursing, Jennifer Boore and Pat Deeny illustrate clearly and accessibly how to develop tailored education programmes so that nurse educators and clinicians in practice can enable their students to provide up-to-date and appropriate patient care.

Research in Nursing, Midwifery and Allied Health: Evidence for Best Practice Marilyn Richardson-Tench, Patricia Nicholson, Beverley Taylor, Stephen Kermode, 2018-01-01. Research in Nursing, Midwifery and Allied Health provides students with the theory to understanding research frameworks in nursing and allied health. Using practical examples, this text applies the theory to practice in a number of updated cases that reflect students across the nursing, midwifery and allied health areas. The research framework introduced in the book has three different intersecting purposes: i) to show students how to critically appraise existing research; ii) to show students how the results of research can be used in clinical practice to inform patient care; iii) to conduct their own research. The sixth edition includes more content than ever before, linking research to evidence-based practice helpfully sign-posted throughout the text in new evidence-based practice boxes. Research in Nursing, Midwifery and Allied Health supports instructors as they guide new nursing researchers through the entire research process in a practical and easy-to-read step-by-step guide. The new four-colour design will be a welcome addition to Cengage's suite of Nursing texts, as well as new CourseMate Express website and Search Me Nursing, giving students unique access to current journals and news articles specific to nursing and health research. *Reflective Practice* Beverley Taylor, 2005-11-01.

Reflective Practice helps nurses and midwives deal with the increased complexity and bureaucracy of their profession by constantly improving their work practices through reflection. Updated to include a new chapter 'The Taylor Model of Reflection', it defines the concept of reflective practice, explains its benefits and offers practical advice on how practitioners can maintain it throughout their careers. A hopeful framework and a healing gift to all practicing nurses. Jean Watson, distinguished professor of nursing, University of Colorado.

Contexts of Nursing John Daly, Sandra Speedy, Debra Jackson, 2006. This book introduces nursing themes from an Australian and New Zealand perspective. It includes discussions on history, culture, ethics, law, technology and professional issues within the field of nursing.
