Reform In China And Other Socialist Economies:

Reform in China and Other Socialist Economies Jan S. Prybyla, 1990 The Chinese State in the Era of Economic Reform : the Road to Crisis Jay D White, 2016-09-16 Presents ten tales featuring Lord Bao a wise judge who was a champion of righteousness and protector of the weak against the powerful China's Economic Reforms Lin Wei, Arnold Chao, 1982 Essays on theoretical and empirical contradictions in China's economic policy reforms since 1976 discusses policy options and economic development trends 1949 1980 economic structure imbalances revival of private enterprises market mechanism and competition under socialism foreign investment potential price policies etc stresses the importance of communes public ownership efficient public enterprise leadership rational decentralization etc Glossary references and statistical tables **China's Foreign Trade Reforms** John C. Hsu, 1989 Recent events in China have revealed a nation struggling to reconcile its new thinking with its traditional institutions and practices This book provides an assessment of one aspect of the reform process the foreign trade system The reforms in China have heralded a new openness in Chinese economic policy In this book his first full length work on the subject Dr Hsu investigates the impact of the reforms on China's foreign trade and consequently on the domestic economy In the process he examines such issues as the role of foreign trade in China's economic development the institutional changes involved in the foreign trade reforms and the efficiency of the new foreign trade incentive system He then evaluates the possibilities for further foreign trade reforms in the future In conclusion Dr Hsu suggests that Chinese enterprises have been slow to respond to changes in domestic and international market conditions and that exposure to foreign markets has exacerbated inflation problems in the Chinese economy As a result he finds that China has not enjoyed the full potential benefits of its reform program This book will be of interest to economists political scientists Asian studies specialists and others interested in the economic ramifications of China's reform process It is a timely and thorough account of this crucial aspect of reform and an important addition to the growing body of literature on the restructuring of modern communist states China's Industrial Reform Gene Tidrick, Jiyuan Chen, 1987 Containing important implications for socialist and other developing countries this book uses newly acquired data to analyze China's far reaching industrial reforms looks at Hungary's reforms and compares Chinese and Soviet systems China's Transition from Socialism Dorothy J. Solinger, 1993 The essays in this volume address the industrial commercial urban and regional reforms of China's planned economy during the 1980s The emphasis is on the dominating institutional and bureaucratic presence of the state even as it sought to loosen the pre 1979 vertically structured centralised command system and to introduce some market principles to stimulate economic activity The essays fall into four categories theoretical and policy discussions and debates at the central leadership level reform of the urban economy and of inter regional relations industrial and commercial reforms and the rise and position of the new entrepreneurial class Many of the essays draw on interviews with Chinese economic officials in the Central China city of Wuhan and therefore this is the only study that uses local data on

actual operations of reforms from a Chinese city the other sources are the Chinese press and Chinese official and scholarly journals In each of the categories there are pieces from different points in the chronological process of reform This study begins with the first theoretical discussions among China's economists and top political leaders in the late 1970s and concludes with experiments with bankruptcy and stock markets in the late 1980s The countervailing heavy presence of the state at both the policy and the practical levels throughout the reform decade is its unifying theme The Impact of China's Economic Reforms Upon Land, Property and Construction Jean Jinghan Chen, David Wills, 2019-04-12 First published in 1999 this volume aims to explore the impact of China's recent economic reforms and dynamic economic progress on land use the property market and construction activity under the leadership of Deng Xiaoping until his death in 1997 Following the famine and bloody mayhem of Mao Zedong's Great Leap Forward and Cultural Revolution Deng Xiaoping took on the task of piecing the country back together to once more become a leading world economy Here Jean Jinghan Chen and David Wills concentrate on his reforms and progress examining at what point power can be said to have passed from Deng Xiaoping to Jiang Zemin to what extent Deng's political philosophy remained in place under the new government and what this means for China's economic reforms on land property and construction The authors provide a view on how management of the physical environment needs to be considered in the context of economic progress to achieve sustainable development

Understanding the Chinese Economies Rongxing Guo, 2012-08-29 China's economic growth has been more robust in some regions than others In a country as large as China examinations of regional differences can provide a viable way to learn about the economy as a whole Rongxing Guo provides a systematic introduction to the economies of China by describing their external and internal drivers and by placing them within geopolitical and even socio cultural boundaries His pairings of case studies and empirical techniques reveal a rich deep appreciation of the growth process and of interactions between key factors This book delves more deeply into issues surrounding the economy than other books offering a unique and important perspective that many will find useful Covering history and administrative structures unique economic features some domestic economic issues and international economic engagement it describes an often inaccessible perspective with nuances all students of China will find valuable Introduces China's regional economies often overlooked in US and European texts within larger contexts of social and geopolitical concerns Explains the reform process since 1978 in a comprehensive non technical and accessible manner Features case studies in each chapter

Chinese Economists on Economic Reform - Collected Works of Yu Guangyuan Yu Guangyuan, 2013-12-04 This book is part of a series which makes available to English speaking audiences the work of the individual Chinese economists who were the architects of China's economic reform The series provides an inside view of China's economic reform revealing the thinking of the reformers themselves unlike many other books on China's economic reform which are written by outside observers Yu Guangyuan 1915 is a famous Chinese philosopher and economist

A member of the Chinese Communist Party from 1937 he has made significant contributions in the fields of Marxist theory and in state planning He was head of the Political Research Office of the State Council from 1975 and the first director of the Economic Research Institute of the State Planning Commission He has held many other important posts and was editor in chief of the Dictionary of Economics The book is published in association with China Development Research Foundation one of the leading economic and social think tanks in China where many of the theoretical foundations and policy details of economic reform were formulated

Recent Chinese Economic Reforms S. CARAPETIS,1984 *Management Reforms in China* Malcolm Warner,1987 Looks at China s attempts to modernize its economy by reforming its industrial management systems Surveys the 1978 1986 period giving general background of economic reforms managerial decision making management education marketing personnel and labour relations

China and Socialism Martin Hart-Landsberg,Paul Burkett,2005-03 China is the fastest growing economy in the world today For many on the left the Chinese economy seems to provide an alternative model of development to that of neoliberal globalization Although it is a disputed question whether the Chinese economy can be still described as socialist there is no doubting the importance for the global project of socialism of accurately interpreting and soberly assessing its real prospects China and Socialism argues that market reforms in China are leading inexorably toward a capitalist and foreign dominated development path with enormous social and political costs both domestically and internationally The rapid economic growth that accompanied these market reforms have not been due to efficiency gains but rather to deliberate erosion of the infrastructure that made possible a remarkable degree of equality The transition to the market has been based on rising unemployment intensified exploitation declining health and education services exploding government debt and unstable prices At the same time China s economic transformation has intensified the contradictions of capitalist development in other countries especially in East Asia Far from being a model that is replicable in other Third World countries China today is a reminder of the need for socialism to be built from the grassroots up through class struggle and international solidarity

Trends of Economic Development in East Asia Wolfgang Klenner,2012-12-06 The economic success achieved in the last decade in East Asia has brought about a fundamental reorientation in the Western view of the region In order to contribute to a better understanding of present events and future developments in the area leading East Asia economists and men of experience in Asian business from Asia America and East and West Europe have written papers on their research or business fields for this volume The individual articles deal with problems common to the East Asian region and the Pacific area as well as with specific economic problems of Japan China and South Korea The volume is divided into four parts East Asia and the Pacific Basin includes articles on supra national issues for example on the international economic relations of Japan China Taiwan and Korea Japan includes articles on Japanese industrial and business structure technological policy exports and other issues China includes articles on structural change economic reforms fiscal policy agriculture and other issues Korea includes articles on economic and industrial policy

restructuring protectionism and other issues The occasion of the publication of this volume is the 70th birthday of Willy Kraus who for many years has been actively concerned with the questions of development in the East Asian region

Recent Chinese Economic Reforms William A. Byrd, 1984 The first of these two studies analyzes the effect of economic reforms and adjustment policies on a consumer durables producer in 1980-82 The incentives created by reforms are analyzed with particular attention to the interaction between changes in incentives and changes in market conditions The main conclusions are that the dominant influence has been the market external controls have been weak and manipulatable labor allocation remains the most unreformed part of the system and the use of bank loans to finance investment has loosened financial discipline The seller's market was transformed into a buyer's market before the reforms could achieve their aims The second study analyzes the effect of adjustment and reform policies on a medium sized machinery producer This factory was given financial incentives and made responsible for sales at the same time that demand for its products fell sharply The enterprise responded by initiating an economic responsibility system of management making an intensive sales effort changing its product mix and attempting to improve quality and diversify its products Conflicting directives an unreformed labor and wage system and price controls limited the performance that might have been achieved Chinese Economists on Economic Reform - Xue Muqiao Xue Muqiao, 2010-12-16 The China Development Research Foundation is one of the leading economic and social think tanks in China where many of the theoretical underpinnings and policy details of economic reform were formulated This book is the first of a series which makes available to an English speaking audience the work of the individual Chinese economists who were the architects of reform The series provides an inside view of China's economic reform revealing the thinking of the reformers themselves unlike many other books on China's economic reform which are written by outside observers Xue Muqiao held many key posts including Secretary General of the Finance and Economy Commission of the Government Administrative Council Director General of the National Bureau of Statistics and consultant of State Council Office for Restructuring the Economic Systems His work included eliminating the serious inflation of the early years of the People's Republic participating in drafting and implementing the First and Second Five year Plans and establishing the initial statistics system and price management system His great contribution was to the development of economic theories and practice following China's economic reform *China's Economic Reforms* C. H. Chai, Chi-Keung Leung, 1987 **Cuba, Restructuring the Economy** Julio Carranza, Luis Gutiérrez Urdaneta, Pedro M. Monreal González, 1996 The study includes an analysis of the internal as well as the external structural constraints on the Cuban economy in the 1990s a detailed analysis of the options for monetary and fiscal reform and proposals for the development of what might be termed a mixed economy organized according to socialist principles There is also a chapter discussing some of the responses both from within Cuba and from abroad to the original publication The introduction by Ruth Pearson discusses the significance of this book for the economic and political debates currently facing Cuba *The Gradual Revolution* Hui

Wang,1994-01-01 The Uprising at Tiananmen Square may have been crushed politically but it has had extraordinary consequences in opening up China to new varieties of economic experimentation Nowhere has this fusion of political repression and economic opportunity been better captured than in Hui Wang s masterful study And given the world wide and historic importance of China this volume deserves most careful consideration Given his unique background as a former assistant director of the China National Economic Reform Institute CNERI hi Beijing and before that a board member of The Economic Daily in the capital city of China he is able to provide the sort of first hand account that deeply enriches this fundamental treatise on the transformation of the Chinese economy from a centrally planned to a market system This book should prove to be especially timely as American investors and businessmen are pouring into China for new commercial ventures while scholars are likewise coming to China in order to obtain information and experience to benefit other struggling formerly socialist economies Wang makes no claim that present day China is necessarily a model for the rest of Asia or Eastern Europe but he does make plain that variations on the theme of a free market and a controlled polity are as much part of Leftist as well as Rightist regimes As a result this book should have appeal quite beyond undergraduate and graduate courses in modern China and should extend to those political scientists and sociologists who take seriously fundamental themes of development
