and real world application The goal of this book is to give readers a familiarity with the wide range of ways in which geoscience principles and geological materials can be utilized forensically Additional resources for this book can be found at <http://www.wiley.com/go/bergslie/forensicgeoscience>

**The Gurob Ship-Card Model and Its Mediterranean Context**  
 Shelley Wachsmann, 2013-01-09 When Shelley Wachsmann began his analysis of the small ship model excavated by assistants of famed Egyptologist W M F Petrie in Gurob Egypt in 1920 he expected to produce a brief monograph that would shed light on the model and the ship type that it represented Instead Wachsmann discovered that the model held clues to the identities and cultures of the enigmatic Sea Peoples to the religious practices of ancient Egypt and Greece and to the oared ships used by the Bronze Age Mycenaean Greeks Although found in Egypt the prototype of the Gurob model was clearly an Aegean style galley of a type used by both the Mycenaeans and the Sea Peoples The model is the most detailed representation presently known of this vessel type which played a major role in changing the course of world history Contemporaneous textual evidence for Sherden one of the Sea Peoples settled in the region suggests that the model may be patterned after a galley of that culture Bearing a typical Helladic bird head decoration topping the stempost with holes along the sheer strakes confirming the use of stanchions the model was found with four wheels and other evidence for a wagon like support structure connecting it with European cultic prototypes The online resources that accompany the book illustrate Wachsmann's research and analysis They include 3D interactive models that allow readers to examine the Gurob model on their computers as if held in the hand both in its present state and in two hypothetical reconstructions The online component also contains high resolution color photos of the model maps and satellite photos of the site and other related materials Offering a wide range of insights and evidence for linkages among ancient Mediterranean peoples and traditions The Gurob Ship Card Model and Its Mediterranean Context presents an invaluable asset for anyone interested in the complexities of cultural change in the eastern Mediterranean at the end of the Bronze Age and the beginning of the Iron Age The Gurob ship card model is was part of an exhibition entitled Beyond the Nile Egypt and the Classical World at the J Paul Getty Center March 27 September 9 2018 Read about it here <http://blogs.getty.edu/iris/egyptian-ship-model-sheds-light-on-bronze-age-warfare-and-religion/> Digital supplement to the book featuring 3D models <http://www.vizin.org/Gurob/Gurob.html>

**Physical Techniques in the Study of Art, Archaeology and Cultural Heritage**, 2006-05-02 The first of its kind this series is devoted to the use of physical principles in the study and scientific conservation of objects with cultural heritage significance It begins with a review of the modern museum which discusses new techniques employed in the conservation of museum artifacts such as X ray tomography and other techniques used to study Egyptian mummies bones and mineralization of bones in the archaeological context and the degradation of parchment All of these topics and techniques are essential for the preservation of our history This includes finding ways to preserve parchment documents and letters which much of our written heritage is documented on so that it can be used and understood for generations to come This book is a must have for any museum as well as any

university that teaches or employs the techniques discussed Written in a style that is readily understandable by conservation scientists archaeologists museum curators and students Provides an introduction to the advanced fields of synchrotron radiation science neutron science and computed tomography Outstanding review of the use of modern technology to study museum and archaeological artifacts Offers solutions through advanced scientific techniques to a wide range of problems facing museum staff     *Andrea Mantegna and the iconographic creation : Madonna of tenderness with dreaming child* Sira Waldner,2009     **Proceedings of the First International Symposium On Analytical Methods In Philately** Thomas M.
