Fieldwork in Geography: Reflections, Perspectives and Actions Rod Gerber, Goh Kim Chuan, 2013-03-14 Geographers regard fieldwork as a vital instrument for understanding our world through direct experience for gathering basic data about this world and as a fundamental method for enacting geographical education The range of international geography and educational experts who contributed to this volume has demonstrated that the concept of fieldwork has a considerable history in the field of geography They have demonstrated that the theoretical aspects of fieldwork have been interpreted differently in regions around the world but the importance of fieldwork remains strong globally A fresh look at the pedagogic implications for fieldwork in formal education offers ideas both for promoting it in geographical education and for maintaining its place in the geography curriculum Audience Forward looking geographers and educators now recognise that alternative strategies especially those involving the use of information technology should be developed to reaffirm the centrality of fieldwork in geographical and wider education □□□□□□□□□□□□□□□□ ,1994 *Third Grade Perspective* Henry J.
